

Monthly Air Pollution Control Program Summary Report

Regional Office Concerns Received or Investigated Between December 16, 2025, and February 15, 2026

Concern Types Received During Report Period

	Total
Total	219
Agricultural Anhydrous Ammonia	3
Asbestos	6
Fugitive Particulate Matter	16
Hazardous Air Pollutant Release	5
Odor	92
Open Burning	64
Other	30
Particulates	3

Note: Concern Type refers to the air category the concern falls under. There may be more than one type associated with an individual concern; therefore, the totals listed here may not reflect the total number of concerns received during the reporting period.

Number of Referral Notices of Violation (RNOV) Issued: 0
 Number of Notices of Violation (NOV) Issued: 1
 Number of Letters of Warning (LOW) Issued: 5
 Number of Letters of Unsatisfactory Findings (UF) Issued: 5

Concerns Investigated During Report Period

	Total
Total	211
Concerns Received Before Report Period	13
Concerns Received During Report Period	198

Note: Concern Info refers to the information provided to the department by the concerned party. The information seeks to accurately reflect the nature of the allegations made. Those statements of allegations do not necessarily reflect the legal standard upon which inspections would be made.

Monthly Air Pollution Control Program Detail Report

Regional Office Concerns Received or Investigated Between December 16, 2025, and February 15, 2026

Concerned Party: Anonymous

Concern Info: *Webform*

Incident Description:

- The alleged violator has been pilling household goods on the property, then burning it. This has been going on for a long time, but has been especially bad the past week (with nearly daily burning). Recently a part of the home and a car also burned. The alleged violator also throws junk onto neighboring properties. Water to this property has been shut off, due to an illegal hook-up, yet they continue to burn materials.
- The fire department has been called out to the property many times, but indicated to the informant that there is nothing they can do to get the alleged violator to stop the burning. Recommended the informant call the EPA.
- The chemical smells coming from the property are really bad, especially while materials are being burned. Often smells of burning rubber or plastic.
- Those living in the informant's house have had issues with their eyes burning and getting headaches. The informant has also vomited due to the smell.
- Other neighbors have also expressed concerns about the burning to the informant.
- Informant has a calendar where they note days the smells/burning are especially bad and has other records that could be made available upon request.
- If this is not something EPA or the state can help with, the informant would appreciate a call on who else they could reach out to in order to try and get help with this situation.
- The informant would like to remain anonymous (that they made the report) but is fine with those trying to help resolve the situation (from EPA, state, etc.) contacting them to get additional information. If you do call, leave a voicemail, as they screen calls. If you haven't heard from the informant within a day, try calling again as their voicemail sometimes fills up.

Driving Directions

65 South to 160 East. Turn right on Sundown Ln. Turn left on Julie Ln. [sic]

Conclusions: CON-793

A copy of PUB2047 Open Burning Fact Sheet was provided to the address listed in the concern. A business card with contact information was left at the entrance to the property.

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64251	12/09/2025	12/17/2025	Randy Vanwinkle	Open Burning	Brookline /Greene	SWRO	BD	Memo
Concerned Party: Anonymous Concern Info: Caller reports large brush piles are being cleared and burned for days at a time with no supervision much of the time [sic] Conclusions: CON-820 No evidence of any burning was observed at the reported address, and claims of unsupervised burning could not be substantiated. Concern was anonymous so no further information can be obtained, no further action required unless additional information is provided								
64262	12/10/2025	12/17/2025	AA Quarry John Rushly, Manager	Odor	Kingsville /Johnson	KCRO	DS	Phone Conversation
Concerned Party: Nelson (Nate) Christensen Concern Info: Concerned party states that DNR should talk to new owners on AA Quarry. The stink is horrible. [sic] Conclusions: No odors were observed during the investigation. The facility believes the odor could have been caused by a clogged nozzle in the system used to neutralize the odor. The nozzle was cleaned upon discovery and has been operating properly since.								
64272	12/12/2025	12/16/2025	MSE Hardscapes	Used Oil	Raymore /Cass	KCRO	DS	Other
Concerned Party: Anonymous Concern Info: Called on COD line-anonymous CP reports that person at 1521 Saddlebrook Rd Raymore, MO in Cass County has been burning tires and other non-vegetative items and has also been reportedly dumping waste oil into the creek near the home. [sic] Conclusions: Compliance assistance on open burning and used oil.								
64298	12/16/2025	12/16/2025	Goff	Open Burning Open Dumps	Burlington Junction /Nodaway	KCRO	MC	Email
Concerned Party: randallblack2121@gmail.com Concern Info: Via Webform email - Submitted at 9:18 am Tuesday, December 16, 2025 - Inquiry/Question Hello, we live in the city of Burlington Junction MO. A neighbor burns his household waste weekly in two, 50 gallon burning barrels. The burn and smoke smolders last between 6-8 hours each session. The city has been contacted but, the owner continues to burn. Is this allowed under Missouri rules? Thank you for your time or guidance on what direction to go. [sic] Conclusions: I informed the concerned party that the described activity did not violate Missouri's open burning regulations. I provided information on Missouri's burning regulations and encouraged the concerned party to work with their local officials.								
64308	12/16/2025	12/17/2025	Brad Clemer	Open Burning Open Dumps: Construction and Demolition	Pleasant Hope /Greene	SWRO	BD	Communication In Person
Concerned Party: Anonymous Concern Info: Caller states that the responsible party burns demolition materials such as shingles, Wire, and whatever will burn. Caller states burning occurs at all hours of the day and night. Caller states that burning is conducted beside the residence. Caller states that the responsible party hauls trash in from other places and burns all the time. Caller states that they hear explosions on a regular basis. [sic] Conclusions: CON-887 A copy of PUB2047 Open Burning Fact Sheet was provided to the responsible party, and they verbally agreed to stop bringing in materials to burn. No further action is required.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64310	12/17/2025	12/22/2025	Robert Morgan	Residential Waste Disposal Open Dumps Open Burning	Seymour /Webster	SWRO	MK	Site Visit
Concerned Party: Anonymous Concern Info: The caller states that an individual moved into a residence located at 26 Log Cabin Dr, Seymour, MO 65746 in approximately May 2025 and started a scrap and trash removal service in the area. The individual is now using the residence as a dump site and burns the scrap and trash onsite. Materials collected include electrical appliances, furniture, tires, and residential trash. The caller states that the livestock pens near the road are being used as a burn area with the area in front of the shed to the south accumulating materials and debris. The caller states that this has been persistent since the individual began the business and has noticed trash/waste that leaves the property, and an increase in mosquitoes during warmer periods. The caller states that the individual is burning approximately once weekly. [sic] Conclusions: CON-899 Robert Morgan was educated on what he could do to remain compliant with the Missouri Solid Waste Law and Regulations and the Missouri Clean Air Act. He was given an educational packet and was told not to burn or bury any waste or bring it back to the property. The property was fairly clean and only contained tires on rims and recyclable metals. Verbal Warning and Education was provided at this time.								
64328	12/17/2025	12/18/2025	Dylan Conrad	Open Burning	Clinton /Henry	KCRO	CK	Other RTC, UF
Concerned Party: Anonymous Concern Info: First noticed in September: House on the property fell down and they bulldozed it into a pile behind the house and in front. Source of concern is building a house where the old one is. Last week they lit the remains of the house, including shingles, on fire and used tractor tires to keep the fire going. CP said there were explosion noises because of the oxygen tanks that were in the house before it fell down. It is still smoking some. You are able to see the pile from the road. Only about 50 yards off of the gravel road. No one is currently living on the site. They are still planning on burning things. CP says there is treated lumber that they plan to burn and miscellaneous other things that they plan to burn. [sic] Conclusions: The previous house at this location was demolished. Wood waste from the demolition was burned, including wood that does not meet the definition of untreated wood. The owner denies burning shingles and used tires. The owner will be issued a report with Unsatisfactory Findings. The owner provided a signed acknowledgement form in order to return to compliance.								
64329	12/18/2025	12/18/2025	David Davenport	Land Application	Cleveland /Cass	KCRO	TC	Email
Concerned Party: Carrie Cronan Concern Info: The concern party stated that David Davenport is having Synagro: Waste Recycling land apply biosolids on his farmland located at East 281st St, Cleveland, MO (38.611086, -94.574842). These piles of biosolids are being left in the middle of the field and it has washed into a nearby creek. According to the concern party there appears to be brown bubbles in the creek now and they weren't there before. The concern party also stated that the odor has been very bad since these piles have been dumped on the property. [sic] Conclusions: No violations of the Missouri Clean Water Law and the Missouri Clean Water Commission were observed.								
64331	12/18/2025	12/23/2025	Bowman Autobody	Odor Used Oil	St. Joseph /Andrew	KCRO	DS	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 1:19 pm Thursday, December 18, 2025 - Date of Incident or First Noticed: 09/01/2021 Gentleman runs an illegal body shop, toxic fumes and over spray going everywhere. Dumps waste all over the ground around his shop from car engine oil in large amounts to paint and reducers in large amounts. Zero care for the air or residents. [sic] Conclusions: CAV conducted. See report for more information.

64337	12/19/2025	12/19/2025	Unknown	Open Burning	/Christian	SWRO	JW	Site Visit
Concerned Party: Anonymous Concern Info: Email concern states there is extreme black smoke originating from a site near the Highway 65 and Highway 14 intersection. [sic] Conclusions: CON-921 I did not observe any violations during this investigation. No action is required.								
64346	12/19/2025	12/23/2025	KC Specialty Tube	Odor	North Kansas City /Clay	KCRO	DS	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 12:11 pm Friday, December 19, 2025 - Date of Incident or First Noticed: 11/03/2025 I notice a strong chemical odor coming from the building when I am walking by. The fumes are noticeable outside and cause burning in the eyes and throat when walking nearby. I have also observed that sometimes the overhead doors on the west side of the building are open, and mist or vapor escapes from the opening, carrying the fumes into the surrounding air. I am concerned for the people in the area and workers inside the building. the building is at 101 West 10th Avenue in KC, MO. I am not sure the company name but the name on the door says KC specialty. [sic] Conclusions: No odors were detected during the investigation. A potential source of odors is idling semi-trucks waiting to be loaded. Regulations regarding heavy duty diesel idling were provided, and the facility stated trucks would not be allowed to idle. No liquids were observed leaving the building. Wash water is collected and disposed of through an environmental company.								
64352	12/19/2025	12/19/2025	City of Boonville	Asbestos	Boonville /Cooper	NERO	JH	Other
Concerned Party: Anonymous Concern Info: Email states, "There are two properties located in boonville, mo that the city had demolished the past couple of days that was said to have had asbestos in which that's why they said they were demolished. My concern is that I don't believe they followed regulations when doing this." [sic] Conclusions: No violations of the asbestos regulations were observed or discovered at the time of the investigation. No further action required to address this concern.								
64356	12/22/2025	12/23/2025	Larry Wald	Odor	Carterville /Jasper	SWRO	JW	Site Visit
Concerned Party: Anonymous Concern Info: Entry from Webform, "C&L grease. The smell is back. It improved for a while when he got in trouble for his storage. Over the last month the smell has come back very strongly. [sic] Conclusions: CON-940 I did not observe any violations during this investigation. No action is required.								
64359	12/23/2025	12/23/2025	Larry Wald	Odor	Carterville /Jasper	SWRO	JW	Site Visit
Concerned Party: Anonymous Concern Info: Email Concern #71336: C&L grease. The smell is back. It improved for a while when he got in trouble for his storage. Over the last month the smell has come back very strongly. [sic] Conclusions: CON-944 I did not observe any violations during this investigation. No action is required.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64360	12/22/2025	12/22/2025	City of Hayti	Water Discoloration Particulates Suspected Water Line Leak	Hayti /Pemiscot	SERO	MW	Phone Conversation
Concerned Party: Dawn Phelps								
Concern Info: P wanted to report a water line leak between East Main St. and South 3rd St. CP states that the water is flowing up around an electric pole and other places and it is a constant flow. There is more than one busted water line through out the town. She is concerned with the temps dropping next week the pipes may freeze. [sic]								
Conclusions: I investigated this concern by phone on the morning of December 22, 2025. I first contacted chief operator KC Gilmer about the concern. KC was aware of the water leak at East Main Street and South 3rd Street. He said the city had received several calls about it and he had already investigated the leak. He said it was a 3/4-inch service line leak and that it would be repaired as soon as the city's vac truck is returned from the mechanic. KC said there were other leaks to repair also when the truck is returned. Reportedly, the city is in the process of replacing their distribution system piping. After my conversation with KC, I then contacted Dawn Phelps (CP) and relayed this information. I told Ms. Phelps that discolored water/sediments can be expected during the distribution system piping replacement due to disturbing old piping. I also told Ms. Phelps (and KC Gilmer) that a boil water advisory would be needed if pressure drops below 20 PSI.								
64363	12/17/2025	12/18/2025	Elementis Specialties Inc	Odor	St. Louis /St. Louis	SLRO	LZ	
Concerned Party: Christy Childs								
Concern Info: We received an odor concern from St. Louis City APCA. The CP states:								
At 8am 11/13 neighbors and I noticed a strong, distant chemical smell in the air. A neighbor said these events are occurring more frequently with greater intensity, mostly late night/early morning. The smell is so strong that it burns throat and gets into the house. Nearby Elementis Specialties has had documented EPA cases of faulty equipment and leaks: https://www.epa.gov/system/files/documents/2023-12/2-final-air-inspection-report-fy23-elementis-specialties.pdf								
Ron, have you heard of any issues like this in the Cheltenham and Dogtown area over the last several years? It is not a normal city smell, this is something more potent. Please note that the neighbor on Nashville noticed the smell much stronger, even inside his house, than I did up the hill from them on West Park, but it was still a strong smell outside. We will continue to document when we notice this concerning smell again.								
Thank you for your attention to this! Christy Childs 5931 West Park Ave 63110 [sic]								
Conclusions: No violations noted at the time of investigation. An email was sent to the concerned person to let him know what our findings are .								
64364	12/19/2025	12/22/2025	Scrap Mart Metals	Odor	Jonesburg /Montgomery	SLRO	JC	
Concerned Party: Tiffany Blattner								
Concern Info: We received an odor concern from the EPA. The CP states: The CertainTeed plant has been omitting noxious compounds does for the past week and a half consistently so strong it makes many of us living near by nausea and causing my migraines to send me to urgent care multiple times. We can't so much as walk our dogs. What can be done about this? And how soon can someone come investigate as this issue is reported? [sic]								
Conclusions: No violations were observed during the site visit.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64367	12/19/2025	12/22/2025	Painters	Odor	/	SLRO	RA	
Concerned Party: Berenice Concern Info: We recieved an odor concern from the I-70/I-270 Area Online Odor Concern Form. The CP is experiencing a Acrid, Chemical paint odor. The garage is closed all night. There's no reason for them to use it. They have a handyman garage already expressed that I have kids is a chemical strong smell because they're using outdoor paint. The handyman team has been painting a bunch of wood inside the garage which encloses order which is extremely harsh. This is not just regular paint. This is paint to be placed outside so it has a lot of more chemicals. I already send them multiple emails and it's still there every time we turn on our vehicles all the smell is there. I have a three month baby and a daughter with asthma. They do not care. I have a service dog they have information for it. That means that I have a child in need. Also I have another six-year-old with asthma and I have a three month baby. We have to smell all this and I sent three emails already and they have not addressed it. [sic] Conclusions: The concern is located in California. Referred the concern to California EPA via their online environmental complaint system.								
64368	12/23/2025	12/29/2025	Neighbor	Open Burning General Water Quality	Oaks /Clay	KCRO	EC	Other
Concerned Party: Anonymous Concern Info: CP informed me that their neighbor was actively burning his yard waste on property right next to the road. CP was unsure if the property was private or village owned. CP was concerned because the property is located next to a creek and they are just washing the debris into the creek. [sic] Conclusions: Issue was forwarded on to the Village of Oaks.								
64369	12/23/2025	12/29/2025	Individual	Open Dumps General Water Quality	Oaks /Clay	KCRO	EC	Other
Concerned Party: Anonymous Concern Info: An individual is actively burning yard waste next to the road in the creek with propellent and washing it into the creek bed. (2 of 2 concerns) [sic] Conclusions: Referred to Village of Oaks.								
64374	12/17/2025	12/23/2025	Jesse Breshears	Open Dumps Open Burning	Bunceton /Cooper	NERO	NG	Report RTC, UF
Concerned Party: Ashley Concern Info: Web form states: "Home located at 15398 Eckerle Ln, Bunceton, MO 65237 has had trash and waste piled high for 5+ years outside their home. Home is located on a hill above/near/along Moniteau Creek. There are lots of junk surrounding the house, trash pile is to the right of the house. During the summer months the smell of the trash is awful. Local farmers have cattle that are on the land surrounding the house. The family living at this location has it looking and smelling like a landfill. Jessie Breshears and his family are renters as the property belonged to Joe Rowles before he passed away. The house is in the Estate of Joe Rowles." [sic] Conclusions: UFRR issued for violation of Missouri Solid Waste Management Law and Regulations and Missouri Air Conservation Commission Regulations. Required actions are to properly dispose of regulated solid waste and provide receipts as proof to NERO office. Second required action is to immediately cease burning or allowing the burning of regulated solid waste.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64375	12/15/2025	12/23/2025	Wyatt Bonecutter	Open Dumps: Construction and Demolition Open Burning	Russellville /Moniteau	NERO	BH	
Concerned Party: Anonymous Concern Info: On December 15, 2025, the Northeast Regional Office received a concern stating that Wyatt Bonecutter, the owner of Land Guard Landscaping, was hauling demolition waste to a property south of 58004 Genny Road near Russellville. The concerned party told me that he is currently dumping waste at the western tip of the property where Genny road intersects with a driveway that turns north. The concerned party alleges that he is hauling waste from his landscaping business to his property. The concerned party told me that the waste consists of vegetative waste, a coffee table, fence panels, a rabbit cage, and carpet padding. The concerned party stated that Wyatt Bonecutter will periodically burn the waste. The concerned party stated that Wyatt Bonecutter used to dump waste further east on the property near a pond, but he burned that pile and it is unknown how the burn residue was managed. [sic] Conclusions:								
64379	12/23/2025	01/02/2026	Shane Bailey	Fugitive Particulate Matter	Wheaton /Barry	SWRO	JW	Site Visit
Concerned Party: Julie Payton Concern Info: Dust from feed mill covers neighboring properties. Neighbors can't cook outside, use outdoor pools/trampolines, or keep windows open. Dust covers pets and cars. Dust was especially bad on Dec. 20-21, 2025, covering the house and car. Informant has doctor's notes indicating how the dust is affecting their health, including making it hard to breath. The informant also has to constantly re-wash dishes/items in house as dust blows in as they enter/exit the house. Just prior to this summer, there was a town meeting where the feed mill indicated they'd build a fence and use water to contain the dust. No mitigation has occurred, dust continues to get everywhere. Dust has been an issue for a couple of years. [sic] Conclusions: CON-956 I did not observe any violations during this investigation. No action is required.								
64380	12/29/2025	12/29/2025	Moyer Concrete LLC, Bryce Moyer	Open Dumps Open Burning	Maysville /DeKalb	KCRO	MU	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 9:11 pm Wednesday, December 24, 2025 - Date of incident or First Noticed: 11/24/2025 At 1001 SE Walnut Street, Maysville, Moyer concrete LLC is dumping concrete debris with things like barb wire, kitchen sinks, and things like house wrap, and tree roots and stumps. It's a 6 acre property and the whole back half is full of debris. Actual tons of debris that should be in a landfill. Now he is dumping closer to the road. A few days before Thanksgiving a burned truck showed up and has been there since. [sic] Conclusions: Letter sent to the facility providing compliance assistance.								
64383	12/23/2025	01/06/2026	Denray Machine	Open Burning	Mount Vernon /Lawrence	SWRO	BD	Communication In Person
Concerned Party: Anonymous Concern Info: Burning plastics [sic] Conclusions: CON-959 Only household waste is burned on site since the site is a shared residential and manufacturing facility. No violations of 10 CSR 10-6.045 Open Burning Requirements were observed, and no further action is required.								
64385	12/29/2025	12/29/2025	Linda Hunt	Other	Clinton /Benton	KCRO	MC	Other
Concerned Party: Linda Hunt Concern Info: Request for assistance - Via Webform email - Submitted at 9:01 pm Friday, December 26, 2025: I was in a tornado in May 2025 I had a lot of damage and owe \$3,000.00 for the last of the \$18,000.00 furnace. I can't afford the rest is there any help I'm disabled and make \$2,600 a month? [sic] Conclusions: I forwarded this request to the department's Division of Energy and requested that someone please reach out to Mrs. Hunt about any energy financial assistance opportunities for which she may be eligible. The division confirmed receipt and stated someone from the Weatherization Assistance Program will reach out to her.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64386	12/29/2025	01/15/2026	Penny Smith	Open Dumps Open Burning	Garden City /Cass	KCRO	MU	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 11:43 am Saturday, December 27, 2025 - Date of Incident or First Noticed: 12/26/2025 Multiple people dumping and burning large amounts of trash/toxic waste/appliances on land. The site is located on the southwest side of the property. There are large clouds that smell when burned. Burnings happen multiple times per week. [sic] Conclusions: Compliance Assistance provided over the phone and a letter with fact sheets was also sent to the residence.								
64387	12/29/2025	12/31/2025	Property Reserve Inc	Odor Open Dumps: Roadside	Lee's Summit /Jackson	KCRO	MC	Email
Concerned Party: Katie Fox Concern Info: Via Webform email - Submitted at 5:55 pm Saturday, December 27, 2025 - Date of Incident or First Noticed: 12/22/2025 There is a horrible, rancid smell down our street starting about a mile from our house, which is near Glendana and Jefferson Street, Lee's Summit 64081. We can smell it all the way from our house. It was mild on 12/22/25 but since yesterday has been absolutely awful. We just drove past the Two Guys and a Hive Local Honey Self Serve Honor Stand on Jefferson Street, Lee's Summit (where the smell starts around there) and noticed several bags (a few yellow, several paper bags), on the opposite side of the road from the honey stand, that look like they've been dumped since earlier this week. Did not get close to investigate. There are fields down there too, so not sure if something died out there. [sic] Conclusions: The odor appears to be from the application of some type of manure or biosolid fertilizer on agricultural fields in the area. Odors from such operations are not regulated at the state level. I also passed the concern along to Lee's Summit Neighborhood Services in case there are some local rules that apply.								
64388	12/23/2025	12/23/2025	AA Quarry John Rushly, Manager	Odor	Kingsville /Johnson	KCRO	MC	Email
Concerned Party: Nelson (Nate) Christensen Concern Info: A horrible sulfur smell is coming from the AA Quarry and has been progressively getting worse since the new ownership of the quarry. The smell was at its worst last night, is getting into the concerned party's home, and is making people sick feeling. [sic] Conclusions: The department had recently investigated a similar concern the previous week. No odors were observed during the investigation. I contacted the manager, John Rushly, to inform him of the concern received today. Rushly confirmed the odor control system runs 24/7. I asked him to check the system, which he said he would. No additional site visit was conducted with this investigation. A re-visit may be necessary if additional concerns are received.								
64391	12/29/2025	12/29/2025	Bi-State Emulsions	Odor Fugitive Particulate Matter	Maplewood /St. Louis	SLRO	RA	
Concerned Party: Anonymous Concern Info: We received a dust/odor concern from an Environmental Emergency Response Incident Report. The anonymous caller caller reported that the facility is releasing noxious odors and it is leaving asphalt residue on cars and private residences. [sic] Conclusions: The facility is located within St. Louis County. I referred the concern to St. Louis County Dept of Public Health.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64401	12/30/2025	12/30/2025	Zach Dishman	Asbestos	Nixa /Christian	SWRO	JW	Phone Conversation LOW, RTC
Concerned Party: Anonymous Concern Info: There is a demolition of building west of the "social" at 14 and Main street in Nixa. Believes asbestos is likely present they are hauling it away now as they leveled it. [sic] Conclusions: CON-1001 During the investigation I observed evidence of a commercial demolition that did not involve a state-certified asbestos inspection nor notification to the department. This is a violation of 10 CSR 10-6.080, so the contractors and owner have been informed of these requirements for future demolitions. No action is required.								
64408	12/31/2025	01/09/2026	City of St. Joseph	Odor	St. Joseph /Buchanan	KCRO	CK	Email
Concerned Party: Priscilla Henning Concern Info: Via Webform email - Submitted at 4:23 pm Tuesday, December 30, 2025 - Date of Incident or First Noticed: 12/30/2025 The St Joseph Missouri landfill needs to be addressed. The noxious and perhaps dangerous odor is overwhelming, especially today, Tuesday, December 30, 2025. Why hasn't the Missouri Dept of Natural Resources undertaken a serious inquiry to the health of those who leave near the landfill? We own a small orchard and garden for 15 years and only in the last five years has the landfill become a health problem. I know my complaint will go nowhere, unfortunately. [sic] Conclusions: No odor violation could be confirmed during the site visit on January 9, 2026. St. Joseph Sanitary Landfill appears to be following required protocol on moving temporarily stored waste from Cells 6 and 7 to the new Cell 8. The contract company is reported to be covering both areas at the end of each day to mitigate the odor after the waste is transferred. This transfer of waste is projected to be completed by January 30-31, 2026. Once the waste is moved, the odor issue is expected to be resolved.								
64411	12/31/2025	01/02/2026	Junior's Construction / City of Cameron	Fugitive Particulate Matter	Cameron /Clinton	KCRO	JS	Other
Concerned Party: Anonymous Concern Info: Demolition project in Cameron is generating a lot of dust with no water application. Concerned party also believes construction material is not making it to a landfill due to proximity to the St. Joe landfill. The material is being loaded into 10-wheelers. Building that was being demolished was condemned 3 years ago and had asbestos paperwork done a year ago. Concerned party is also concerned about the fill being used not being clean fill, as they noted wood and concrete in the fill material. [sic] Conclusions: No violations were observed during the investigation. Demolition company was informed of the concern and advised to take appropriate steps to prevent fugitive emissions from leaving the site.								
64416	12/30/2025	12/30/2025	Jeff Schafer	Asbestos	Nixa /	SWRO	JW	Communication In Person LOW
Concerned Party: Anonymous Concern Info: Caller states that contractors are demolishing commercial stores on Main St in Nixa without having inspected the building for asbestos nor notifying the DNR of the project. [sic] Conclusions: CON-1017 During the investigation I found evidence of a commercial demolition that did not include an asbestos inspection nor notification to the department. A Letter of Warning requiring inspection and notification was issued on January 8, 2026. The demolition will be paused until the required actions are complete. A response is due by February 7, 2026.								
64429	01/02/2026	01/02/2026	Adam Wormington	Odor	Monett /Lawrence	SWRO	JW	Communication In Person
Concerned Party: Anonymous Concern Info: Caller states that Double O Organics is releasing excessive odors at 8:30 a.m. on Friday morning. The caller first noticed the odor 3 miles SW of the facility. The winds were out of the E/NE during the concern call. [sic] Conclusions: CON-1022 I did not observe any violations during this investigation. No action is required.

64434	01/05/2026	01/06/2026	Fred Straight	Open Burning Odor	Parkville /Platte	KCRO	CK	Phone Conversation
Concerned Party: Lynn Schmidt Concern Info: Via Webform email - Submitted at 12:24 pm Sunday, January 4, 2026 - Date of Incident or First Noticed: 01/02/2026 On Sundays, on numerous occasions, my neighbor burns trash that includes plastics. The smell/stink, depending on wind direction, often permeates my yard and makes it unsafe to breathe outdoors. This has been going on for sometime and usually occurs Sunday mornings. I have not personally addressed the issue with him. I would prefer to remain anonymous when it is addressed. [sic] Conclusions: The burning did not appear to violate Missouri's open burning regulations, as responsible party reports that he was only burning household trash. Responsible party has voluntarily agreed to stop burning.								
64435	01/05/2026	01/15/2026	Susan and James Peters	Open Dumps Open Burning	Craig /Holt	KCRO	MU	Other
Concerned Party: Anonymous Concern Info: Copied from EPA online form: "Digging holes to bury trash and chemicals. Concerned Party: Nelson (Nate) Christensen Concern Info: Via email submitted on Wednesday, December 31, 2025, at 8:15 p.m. 8:04 pm. 12/31/25. Smell is horrible. I guarantee they shut off the drip at night to save \$\$\$!! I will reach out to state representative. This is unacceptable! Can't even go outside . I've complained for years, other neighbors have Also. You have let us down!! They know you will do nothing to them and will not come out at night. Very disappointed. [sic] Conclusions: Interviewed the concerned party and the facility. Facility is not aware of any upsets that would cause the issue. Odors appear to be worst in the evenings around 8 p.m., so after-hours monitoring may be required. Concerned party will monitor the situation and provide updates.								
64453	12/21/2025	12/22/2025	Eucario Sanchez	Open Dumps: Construction and Demolition Open Burning	Cape Girardeau /Cape Girardeau	SERO	BC	Phone Conversation
LOW, RTC Concerned Party: Anonymous Concern Info: rec'd via email - cp states: At the intersection of state highway 177 and county road 649 a construction company has opened a burning dump. They are hauling trash in and burning it by truckloads. They have three tractors to stir the burning piles. It is about 500 feet from a grade school, nell Holcomb. Ridiculous, the smell and smoke as well as the trash blowing all over. Big piles of burned material are building up. I thought the school would complain due to the smoke and the smell and trash blowing. I can't believe they can just start hauling trash out here and burning it. [sic] Conclusions: On December 22, 2025, Bailey Gargac and Lyndsey Rightnowar conducted a drive by of the reported location. The driveway was identified, however, the driveway and reported area were located in a lower lying area allowing for limited visibility. From the roadside, apparent construction/demolition waste appeared on the property with visible smoke (smoldering) observed. On December 23, 2025, Jesse Evans, Environmental Supervisor, contacted Sanchez Construction based off information from the concern and talked with owner Eucario Sanchez. Mr. Sanchez acknowledged bringing back waste materials and open burning items. He was advised to cease these activities and that a department team member would contact him to meet at the site for further discussion. A site visit was conducted on December 30, 2025, by Bobbie Clark and Lyndsey Rightnowar. We met with Eucario Sanchez on site and observed violations to the Missouri Solid Waste Laws and Missouri Air Conservation laws. A Letter of Warning was issued to Mr. Sanchez on January 2, 2026. Please review report for additional details.

LOW Concerned Party: Greg Landis Concern Info: This person is burning various construction materials. We're getting toxic plastic smelling smoke in our home when the wind blows our direction. He is accumulating large piles of various construction materials including shingles, plastic, wood and metals. This area is zoned agricultural and we have numerous creeks and ponds in the area with large quantities of wildlife. This smoke is making my family sick. He seems to be burning at night so the smoke isn't visible and it smolders for hours and hours. [sic] Conclusions: LOW issued for both solid waste and open burning violations.

64460	01/05/2026	01/06/2026	APAC Bates City Quarry	Fugitive Particulate Matter	Bates City /Lafayette	KCRO	MC	Other
Concerned Party: Anonymous Concern Info: Their dust is leaving their property again. I believe this had happened many times before and has affected plants and animals in the area, not to mention humans and their dust on homes, too. Possibly the soil in our woods is turning alkaline from them as some large oaks have died from reason. I plan to test for this soon. Have not contacted an arborist to confirm. Am including a screenshot of an online AQI of the area from IQAir.com at 11 am. It is more polluted in our rural area than most of KC. I am home today with either flu or bad sinus problem and heard a lot of noise coming from their direction. It is not possible to see the actual site by land from highway. There would be no other farming or other pollution producer. [sic] Conclusions: Previous concerns have been submitted to the department and investigated with no violations observed. Historical data on the website provided by the concerned party was reviewed. The daily AQI and PM2.5 values were not higher at the Chapel Hill site referenced by the concerned party compared to two sites operated by the department in the Kansas City area (Front Street and Liberty).								
64461	01/06/2026	01/09/2026	AA Quarry John Rushly, Manager	Odor	Kingsville /Johnson	KCRO	DS	Email
Concerned Party: Nelson (Nate) Christensen Concern Info: Via email submitted on Monday, January 5, 2026, at 5:55 p.m. 1-5-26, 5:53 Smell is awful 7 of 10. [sic] Conclusions: A site visit was conducted on 01/09/2026 during the day. No odors were detected. The concerned party will continue to update the regional office. An after-hours visit may be necessary if the situation continues.								
64467	01/06/2026	01/09/2026	AA Quarry John Rushly, Manager	Odor	Kingsville /Johnson	KCRO	DS	Email
Concerned Party: Sandy Banks Concern Info: Via email submitted on Tuesday, January 6, 2026, at 3:56 p.m. The smell from the quarry on AA has been awful again lately. Also I don't think they are watering down. I've really noticed the white dust on my house deck and porch again as well. Sometimes the smell is over whelming how bad it is. Again this seeps into my house in the middle of the night and is enough to wake me up. I've also noticed it during the day. I was on vacation all last week and smelled it several times. If you could please make a trip out there, all of us in Forest Ridge addition would appreciate it. None of want to complain but its to the point that we have to again. I really don't understand how they don't get in trouble for not doing what they are suppose to be doing. Obviously what the chemical they were using was doing the job as we didn't smell it for a long time but they aren't doing it anymore. [sic] Conclusions: A site visit was conducted on 01/09/2026 during the day. No odors were detected. Another concerned party will continue to update the regional office. An after-hours visit may be necessary if the situation continues.								
64470	01/06/2026	01/08/2026	Northern Stone county Road Dep.	Open Burning	Galena /Stone	SWRO	BD	Phone Conversation
Concerned Party: Danny G G Harness Concern Info: Environmental Concern 71851 Email: Northern Stone county road and bridge department 31809 State highway 413 Galena Missouri 65656. They're getting ready to burn in their trash pile, but I have watched them dump asphalt and Diesel right where they're going to burn and when they burn it smokes me out and I'm less than 500 ft from it [sic] Conclusions: CON-1071 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed. The county road and bridge department use this site to stage vegetative waste, before taking it to a different location that is appropriate to burn. No violations were alleged in the concern, and no violations were observed.

64471	01/07/2026	01/09/2026	Dylan Burns	Permitting Odor	Jasper /Jasper	SWRO	DH	Other
Concerned Party: Matthew Newman Concern Info: Caller (Matthew Newman) stated his neighbor recently sold his property (11534 Thorn Road) to an employee of C&L Grease and they are starting to stockpile material on it. He said the odor was so bad his family could no longer go outside. He was concerned that they didn't have any BMPs around the stockpile or around the property perimeter yet, but also stated no runoff was observed. The property is bordered by a stream. Newman seemed certain that the material was from C and L Grease and they may be planning to use it as a land application site. I initially told Newman staff from Water Pollution would call him back to discuss if it was a permitted site. Update (JLG): Caller believes the material is a byproduct of dog food manufacturing. Along with the dumped materials, there are also piles of mulch and sawdust onsite [sic] Conclusions: CON-1095 This concern is a copy of CON-1039. A permit application has been received by the department and is in the process of being reviewed and issued to Midwest Organic Solutions. The department is providing compliance assistance to the owner to obtain the required permits and maintain compliance with the Missouri Clean Water Law.

64481	01/08/2026	01/14/2026	Drexel WWTF Operator, Crystal Ruten	Minor Wastewater Facility Odor	Drexel /Cass	KCRO	HM	Phone Conversation
Concerned Party: Cole Eastwood Concern Info: Concerned that the Drexel WWTF (lagoon system) might not be working properly as they have an extremely bad sewage smell all over the town. Its been going on for a year now and the smell is getting offensive. They constructed a wastewater storage basin to convert their system to a non-discharging system but the smell issues began after they added it. The last SSO inspection was conducted in 2023 (FC) and the last wastewater inspection was in 2020 (LOW). City of Drexel permit link: https://dnrservices.mo.gov/env/wpp/permits/issued/docs/0023655.pdf On their permit they have a North WWTF, a South WWTF, a Wastewater Storage Basin and a Center Pivot Land Application Field. Drexel North WWTF is in Cass County, and Drexel South is in Bates County. [sic] Conclusions: I reached out to the city about the concern. Land application of wastewater was the source of the concern. This activity is allowed and must be conducted in accordance with the requirements of Missouri state operating permit MO0023655.

64499	12/17/2025	12/19/2025	Liquid Environmental Solutions	Odor	St. Louis /St. Louis City	SLRO	GH	
Concerned Party: Dan Abrams Concern Info: We received and odor concern via email through one of our SLRO inspectors. The CP states: Good morning. We haven't said anything in a while, but we still experience a powerful, foul odor coming from a nearby company. We suspect that this is Liquid Environmental Solutions on 6400 McKissock Ave, which we have all discussed previously. We have tried to just live with it sometimes, but the smell is particularly bad today. We know that some of the other businesses nearby are upset by this as well. Further, we have had comments from visitors here. Are you able to look into this? What might it take to get some control on the odors they are allowed to release? Thank you for your time Dan Abrams Co-President deVan Sealants, Inc. 6301 Prescott Ave. St. Louis, MO 63147 314-553-8537 – Direct 314-383-1941 – Main Office (ext 137) ISO 9001:2015 certified [sic] Conclusions: No violations of Missouri's Odor Regulation 10 CSR 10-6.65 were noted during my site visit.								
64505	12/30/2025	12/31/2025	Fruitland WWTF	Minor Wastewater Facility Odor	Fruitland /Cape Girardeau	SERO	MR	
Concerned Party: Michelle Jones Concern Info: Jesse Evans received a call from Christine Jones (573-842-8280) in regards to some strong sewer smells and concern over mismanagement of the Fruitland Wastewater Treatment Facility. She is concerned they may be adding chemicals at the plant as well and occasionally feels that she gets the sewage odor from the manholes near her house at 2705 State HW FF, Fruitland. [sic] Conclusions: I arrived on site December 31, 2025, and started the investigation outside the facility at where I could detect a foul odor. I discovered that the building on the hill before the treatment facility was an old meat processing business and hadn't been in use for a while, but the old grease traps remained. I checked both sewer access covers outside the facility but could detect no issues. Operator Trent Evans saw me outside the facility and provided access inside, and we discussed the concern of foul odor. I was provided a tour of the facility and shown all the major working parts exposed to the outside atmosphere and winds. We looked at the creek downstream from the outfall - no issues or violations were detected. Odor of septage was noted when I was within 5 feet of the clarifiers and the influent location, but at no other time were there issues indicated nor could I substantiate that an issue existed. Upon return from the investigation, I spoke with Jesse Evans, and he stated he would make the follow up call to the CP.								
64509	12/28/2025	12/31/2025	Cedar Creek RV Park and Resort	Odor	Columbia /Callaway	NERO	ME	Report
Concerned Party: Anonymous Concern Info: The concern was submitted through an online webform. The concern stated "Noticed strong sewage odors from property when deer hunting. Returned back to area during alternative season, and the smells are worse. This establishment keeps growing, but I don't think they have a sewer system (or if they do, it's becoming too small to handle all the additional sewage). I noticed the smell last year when I hunted the area as well, but this year is significantly worse. This is some sort of RV campgrounds, but they also have permanent residential apartments and Air BB facilities as well. They are also some sort of church or something like that. They are name of the business is Cedar Creek RV park and Resort. " [sic] Conclusions: At the time of the inspection, I did not observe any excessive odors or evidence of overloading of the wastewater treatment facility. The facility was issued a Report of Unsatisfactory Findings for failing to register as a Class V Underground Injection Well.

Concerned Party: Anonymous Concern Info: The crematorium has a lot of black smoke coming from it. Started around 11 AM today. Doesn't appear to be occurring. Worried about the air quality. [sic] Conclusions: CON-1133 I did not observe any violations during this investigation. No action is required								
64512	01/07/2026	01/12/2026	Luxy Rodden	Open Burning	Eldon /Miller	SWRO	BD	Memo
Concerned Party: Tabatha Burke Concern Info: Caller states that neighbor is burning trash, including plastic products. Burned a few days ago and neighbors are sick. Previous occupants also burned. Neighbors dug a hole and burn constantly. Caller states that the items burned is household trash. [sic] Conclusions: CON-1101 Violations of 10 CSR 10-6.045 Open Burning Requirements were not alleged in the concern report. I contacted the concerned party to let them know what Missouri's Clean Air regulations cover for open burning, as well as what materials are regulated and not regulated. I informed the concerned party that they could contact us in the future if they notice any burning of regulated materials								
64514	01/09/2026	01/12/2026	Amos Meek	Fugitive Particulate Matter	Stover /Morgan	SWRO	JW	Phone Conversation
Concerned Party: Dennis R McElroy Concern Info: The neighbors home burnt down (only the floor and 1 full wall left standing) on April 16, 2025. Several pets and their daughter died in the fire. The house is less than 50 yards from our home. The address of the burnt home is 9010 Acorn Lane, Stover, MO. Within a couple days of the fire, I noticed finr particles of ash blowing in the air like snow when the wind came up. The owner at the time of the fir was Kevin Crook. He sold the property to Amos Meek (Independence, Mo) in August 2025. The burnt home still has not been cleaned up and every day when the wind blows hazardous partickes fill the air! I have a homebound son with stage 4 COPD and Emphysema. He is on oxygen 24 hours a day. The burnt house needs to be cleaned up. My son has struggled to breath much worse since the fire. When the wind blows you still find ash particles on our vehicles. The old burnt house is causing serious health issues for my son and I. I have severe allergies as well. I have attempted contact with the new neighbors without success. My phone number is 573-569-3074. [sic] Conclusions: CON-1140 I did not observe any violations during this investigation. No action is required.								
64515	01/09/2026	01/15/2026	A&M Construction	Open Burning	Carterville /Jasper	SWRO	JW	Site Visit
Concerned Party: Sue York Concern Info: Residential builders are burning construction waste and causing smoke concerns in Carterville. Concern originated with a phone call to EPA nd says the burning is occurring in Duenweg but the location description suggests unincorporated area between Carterville and Duenweg, probably with a Joplin address. Carterville FD was called out but said they could not extinguish fire in Duenweg area. [sic] Conclusions: CON-1145 I did not observe any violations during this investigation. No action is required.

Owner works for a painting company and the alleged items being burned is the plastic paint drop sheets. [sic] Conclusions: CON-1157 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the investigation. No further action is required.								
64524	01/12/2026	01/14/2026	Joseph Shirley	Open Burning	Rogersville /Greene	SWRO	JW	Phone Conversation
Concerned Party: Anonymous Concern Info: Shirley's Heating and Air in bringing in business waste and is burning on-site. Burning started in 2024 and the frequency of the burning greatly increased in 2025. Burning is occurring in the back lot, behind the property fence. [sic] Conclusions: CON-1158 I did not observe any violations during this investigation. No action is required.								
64526	01/13/2026	01/22/2026	Fiberglass Tank Solutions	Odor	Camdenton /Camden	SWRO	BD	Communication In Person
Concerned Party: Yvonne Selby Concern Info: Odor concern - smells like fiberglass burning occurring nearly daily at 7:00 am in the morning until early evening [sic] Conclusions: CON-1174 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors were observed during the site investigation. No further action is required, but odor surveillance will continue if additional concerns are received.								
64534	12/29/2025		David and Tanya Coomer	Other	Whitewater /Cape Girardeau	SERO	JE	Report
Concerned Party: Anonymous Concern Info: Received by email on PDWB concern. CP States: of course, we also watched David Coomer tear a old house down on Henderson Street, the guy lit it on fire and buried it asbestos and all that runs close to water lines in Whitewater, Mo. on Henderson Street. This was done last summer. wind blowing asbestos materials all over the neighborhood. Was anything done???? No, EPA was called since he buried and burned a house sided in asbestos on his property nothing was done, what about the ash that burnt for 2 days afterwards floating everywhere into yards, water meters etc. Just a few concerned citizens about water contamination all on Henderson street Whitewater, Mo. [sic] Conclusions: A Letter of Warning was issued to David Coomer on December 17, 2024, for improper disposal of construction and demolition waste. Following the letter, Mr. Coomer provided responses including receipts to verify proper cleanup had occurred on the site. For full details, please refer to the Letter of Warning issued to David Coomer. A Compliance Status Update was issued to Mr. Coomer on March 11, 2025, following the verified cleanup of the materials.

64535	12/24/2025	12/29/2025	John Krypciak	Other	Poplar Bluff /Butler	SERO	HC	Site Visit
Concerned Party: Don Slaughter Concern Info: rec'd via email: cp states: The caller stated that his neighbor had a home fire which was extinguished but has subsequently been demolishing his damaged home and lighting it on fire at night. The structure that is being burnt is less than 50 feet away from the caller's home. The caller stated that the neighbor waits until dark to light the fire on construction debris. The caller has also contacted local law enforcement and local fire department but there has been no response. This incident is being referred to the department's Southeast Regional Office for further follow up or investigation. [sic] Conclusions: On December 29, 2025, I arrived on site around 3:30 p.m. I attempted to make contact. I attempted at the front door of the house which appears to be a near complete loss to a previous fire. There was no one in the house, I tried the trailer home which was also unsuccessful. I left the property and returned shortly to insure I left the proper information and was greeted by Andy Kelm. Andy explained that they did burn some things recently but to his knowledge there was no prohibited material, he did state there may have been around three partial pieces of siding that may have been mixed in. I explained proper disposal of construction and demolition debris and provided Andy with "Facts on Open Burning under Missouri Regulations - PUB 2047", "Managing Construction and Demolition Waste - PUB2045" and "Illegal Disposal of Construction and Demolition Wastes - PUB-2251" and left the property. I spoke with Don Slaughter on December 30, 2025, to communicate the findings of the investigation and to ask if there is any other information he would like to be provided. After our conversation I provided my contact information for future needs.								
64536	12/27/2025	12/31/2025	William Dischbein	Other	Bismarck /St. Francois	SERO	BG	Phone Conversation
Concerned Party: Anonymous Concern Info: Mold covered items are being pulled out of a home that is FULLY covered in black mold and being burnt in the front/side yard. The home itself is extremely dangerous for anyone to be in, and now the mold is being burnt instead of being properly dealt with and released into the surrounding air. [sic] Conclusions: On December 31, 2025, I arrived at the property where the open burning occurred. From the driveway, I was able to see a burn pile, but I could not tell what had been burned. I approached the front door, no one was on site at the time. I left my contact information on the door with fact sheets pertaining to open burning and proper disposal. On January 5, 2026, I spoke with William Dischbein on the phone. He stated that they had burned some vegetative wastes, untreated 2x4 boards and some wood paneling. I informed him that the wood paneling could not be burned, nor could any other treated wood or construction and demolition wastes. He stated that the rest of the renovation waste would go into a dumpster.

64542	01/13/2026	01/21/2026	Aaron Powell, Monster Tree Service	Fugitive Particulate Matter	Sparta /Christian	SWRO	BD	Phone Conversation
Concerned Party: Anonymous Concern Info: The people living at 107 Laurel Road, Sparta, MO have been burning logs as part of their tree cutting business. They have recently built a shop in the neighborhood to be the location of their business, "Monster Tree Services". They burn a lot of logs that make the whole area smell. There are a lot of older people living in this area and smoke is harmful to them. It is also a safety hazard because the whole area is filled with so much smoke that it looks foggy and is hard to see when driving. They have been burning logs over the past 2 months but this was the first recorded incident. [sic] Conclusions: CON-1176 The business does not typically burn tree waste at this location, but had an incident where a mulch pile caught fire and burned for three days. The company was provided PUB2047 and department contact information. No further action is required.

Concerned Party: Anonymous Concern Info: This guy needs some checking on. Buddy at lumber yard said other side got hired to move a house trailer to this place. Said he was going to sell the old crappy thing. Everyone in town knows he burns it or bury it on the backside of his hill. He does it all the time. They left it near the highway in the yard. [sic] Conclusions: CON-1180 No violations found at time of investigation. Educational packet								
64548	01/13/2026	01/21/2026	A1 Walls and Landscape	Open Dumps: Construction and Demolition Open Burning	Ozark /Christian	SWRO	BD	Communication In Person
Concerned Party: Anonymous Concern Info: Incident Description: Dumping and burying unknown construction debris. Burning of unknown materials. I'm located several 100 yards away and sometimes the burning has a toxic smell. [sic] Conclusions: CON-1185 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required.								
64558	12/30/2025	01/06/2026	Residential	Open Burning	House Springs /Jefferson	SLRO	PT	
Concerned Party: Tim Hardin Concern Info: My name is Tim Hardin. I live in bear creek Estates trailer park in northern Jefferson County. My address is 5550 park dr. House springs Mo. 63051. I am reporting an almost constant burning of trash. It is not just one address. It is happening at probably 25% of properties in this neighborhood. That is a conservative guess. It is probably more. I've exhausted every other avenue. The police won't touch it. The health department can't do anything. The EPA didn't do anything. The fire department will make the people put out the fire and leave. My neighbors are aware that it's me making the reports. I know that I've put a potential target on my back by taking this stand but the problem persist. I would like to help fund public awareness by paying for informative yard signs or something like that. Many times when trailer homes get demolished... the material gets burned instead of paying for a dumpster. Everything goes into the fires. Fiberglass, tar, lead... everything that cant be sold for scrap metal. Anything else likely gets gets buried. I drag tires and other trash out of the wet weather creek behind my house every year. And more keeps washing down from the ileagle landfills that are up hill from me every year. Last summer, during a red flag day... a man was burning trash and caught his house and the next two down wind trailers next door on fire. Two of the three structures were completely destroyed. Untill just a couple of months ago there was a group of squatters in a house 2 doors down from us burning trash almost daily. It was very nerve racking. Becuase there are a buch of dense cedar trees right between their regular burn barrow and my back porch. I feel that another group of people could move into the house or the other two abandoned houses on all sides of my property. The potential for spreading fire is obviously a threat but the guarantee that my kids are growing up with constant exposure to micro plastics and other toxins is my real motivation for making this report. I've lived here for 19 years and it's been going on the entire time. I'm ashamed that I've stopped trying at times and simply put it on the back burner. It has taken me this long to figure out that DNR is who I'm supposed to contact. These are not just people burning their residential trash. Often they are melting down the insulation from wire for scrap metal at scale. ** SEE SHAREPOINT CON-996*** [sic] Conclusions: I observed no open burning violations, and the concern has been referred to solid waste and scrap tire for follow-up.

64559	01/07/2026	01/08/2026	Residential	Open Burning	St. Louis /St. Louis City	SLRO	LZ	
Concerned Party: Anonymous Concern Info: We received two anonymous open burning concerns from the DNR website. The first CP states: Neighbor at 1908 Sidney conducts chronic open burning, creating a public nuisance. Under St. Louis Ordinance 71260 (Section 11.110.020.D), smoke that is "offensive or objectionable due to excessive or lingering smoke" is prohibited. With the current State Drought Alert (extended through April 2026), these fires pose an immediate wildfire threat to our block. Please initiate a formal nuisance abatement investigation. This property has been a nuisance for a while and threatening the health of neighborhood. The second CP states: 1908 Sidney st Saint Louis Back yard open burning creating a nuisance for the neighborhood with excessive smoke getting into others yards and houses may be violating local ordinances and the clean air act. Property has been a problem for a while. Police and fire department has been called out several times. Ask that appropriate laws and ordinances be enforced . Health hazard especially for the young and vulnerable [sic] Conclusions: No violations at the time of the investigation were observed.								
64560	01/09/2026	01/13/2026	Residential	Open Burning	Cedar Hill /Jefferson	SLRO	JC	
Concerned Party: Anonymous Concern Info: We received an anonymous open burning concern from the DNR website. The CP states " My neighbor at 6194 Jan Ct is burning a large amount of something that smells very bad and it filling the air with dark smoke. It started at 930 PM today. It smells like plastic or some volatile compound burning. It does not smell like a normal bonfire. It is burning my lungs. It could also be 7 Harris CT. I can't tell exactly. The entire neighborhood is filled with a dirty smoke plume." [sic] Conclusions: No violations were observed during a site visit.								
64561	12/31/2025	01/06/2026	Unknown	Open Burning Open Dumps Odor	House Springs /Jefferson	SLRO	PT	
Concerned Party: Tim Hardin Concern Info: CP stated that his neighbors in the trailer park burn their own trash and perform other activities such as wire smelting. He states that leftover material from the smelting process and leftover trash is dumped out in the woods. He stated that there is a strong odor out near the area. I told him that typically people can burn their own household trash. He stated that he believes one of the neighbors takes other people trash and burns it for profit. I told him an inspector will contact him regarding the potential trash dumping, odor, and possibly burning other people's trash. He stated that the main neighbor that causes most issues is located at 5591 Stonecrest dr., House Springs, 63051. [sic] Conclusions: I observed no open burning violations, and the concern has been referred to solid waste and scrap tire for follow-up.								
64564	01/14/2026	01/15/2026	Protein Solutions	Odor	Joplin /Jasper	SWRO	JW	Site Visit
Concerned Party: Drew Reynolds Concern Info: I am the Director of Facilities Management for Ozark Center in Joplin, MO. My facility located at 3901 E 32nd Street, Joplin, MO, sits by several plants that make protein, animal products, and paper goods. This week the odor has been intense. I was wondering if there are any monitoring solutions set up to help regulate this in the area. I am getting several complaints daily [sic] Conclusions: CON-1195 I did not observe any violations during this investigation. No action is required.

64566	01/14/2026	01/22/2026	Timpte Trailers	Asbestos	Linn Creek /Camden	SWRO	BD	Report
Concerned Party: Anonymous Concern Info: Renovation project being conducted at the site in the previous kitchen area in back of building. Concerned about improper mold and asbestos removal. [sic] Conclusions: CON-1202 An Unsatisfactory Finding No Response Required will be issued for failure to inspect for asbestos prior to renovation. An asbestos inspection was conducted and no asbestos was identified, but all renovation activities are complete. No further action is required.								
64568	01/14/2026	01/16/2026	Forsyth	Odor Bacteria in Water	Forsyth /Taney	SWRO	JO	Phone Conversation
Concerned Party: Sandra Taylor Concern Info: Caller is concerned about their water quality. Caller says that the water in the small kitchen smells like sewer when turned on. Caller also said they have sores in their nose, headaches, and shortness of breath. Caller said that symptoms disappeared during a break from the diner and contact with the water. Caller says symptoms returned after they came back from break. The caller said the problem has been going on for approximately a year and half to two years. Caller says the stopped drinking the water 1.5 years ago, but that they would suffer vomiting and diarrhea after drinking the water. I asked if the caller had a filter or softener at the diner. The caller stated that they do not have a filter or softener. I then asked if there was a better time of day for the investigator to arrive. The caller said that the diner in open Monday through Friday from 8-3 and asked if the investigator could arrive after 3. They then said that before 8 would be better, since the water has a stronger smell in the morning. [sic] Conclusions: CON-1203 Concerned party declined to pursue the concern.								
64571	01/15/2026	01/16/2026	Elmer Landsown	Open Burning	/Polk	SWRO	JW	Communication In Person
Concerned Party: Anonymous Concern Info: PER INTERNET FORM Please describe your concern, including the location on the property. Resident, located on S 120th Road between the Frisco Highline Trail and Tommie Creek crossing, is burning materials causing large plumes of black smoke. This has happened several times, but the most recent was Sunday January 11, 2026 around 2:30pm. The Polk Count Sheriff was contacted and was told Morrisville Fire was notified as well. [sic] Conclusions: CON-1205 I did not observe any violations during this investigation. No action is required.								
64572	01/15/2026	01/15/2026	unknown	Odor	/Greene	SWRO	BD	Referred to Other Agency
Concerned Party: Jeff Concern Info: The reporting party "Jeff" called in and stated that he is smelling a very strong odor of "burning oil" around his house located in the vicinity of South Orchard Crest Ave and Grand Street, Springfield. Jeff said that his drive to work this morning, down West Bypass he could smell it. He stated he smelled the odd odor around October 2025 and again this morning. He was unsure where it is coming from. I explained that someone may have an oil burning stove nearby. He figures if that was the case he would have smelled it more often. He gave me his phone number in case the investigator wanted to call for questions. It is 417-983-0074 [sic] Conclusions: CON-1207 Concern has been forwarded to the City of Springfield Environmental Services

64575	01/15/2026	01/16/2026	Rosehill Gardens	Odor	Belton /Jackson	KCRO	MC	Other
Concerned Party: Anonymous Concern Info: Via Webform email - Submitted at 8:00 am Thursday, January 15, 2026 - Date of Incident or First Noticed: 01/06/2026 I work in south west Grandview, and as I get close to work on 71 south and 150 west, I and many other coworkers smell an unusual chemical smell that has not gone away for over a week. This is highly concerning and I am worried for my health. [sic] Conclusions: Odor is likely from Rosehill Gardens at 15600 S Prospect, Belton. Rosehill has been dealing with a large smoldering mulch pile since late December. Belton Fire has been monitoring, and Rosehill is working to extinguish. There have been several days over the past couple weeks with SSW winds, which would blow the odors in the area of 150 Hwy and I-49 (US Hwy 71).								
64581	01/05/2026	01/08/2026	Jeremy Gregory	Single Family Residence Wastewater Used Oil Open Burning	Troy /Lincoln	SLRO	HJ	
Concerned Party: Anonymous Concern Info: EER received a concern from the National Response Center regarding dumping on a property in Lincoln County: "CALLER REPORTING DUMPING OF SEPTIC WASTE AND AUTOMOTIVE OILS AND FLUIDS INTO A CREEK ON PROPERTY GROUNDS. CALLER ALSO STATED THERE IS A HEAVY CHEMICAL ODOR AROUND THE PROPERTY DUE TO THE PROPERTY OWNER BURNING ALL UNDUMPED MATERIALS ON PROPERTY GROUNDS." [sic] Conclusions: No environmental violations observed during site visit. Provided Fact Sheets. If another concern is received about the property, request the CP's contact information so we can get more details.								
64592	01/15/2026	01/16/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	JW	Site Visit
Concerned Party: Jonathan Bass Concern Info: Caller stated that the odors coming off of a new composting facility. Caller states that they live approximately .25 miles east of the facility. Caller states that they noticed the odors especially bad the evening of 1/14/26 and the morning of 1/15/26. [sic] Conclusions: I did not observe any violations during this investigation. No action is required.								
64593	01/15/2026	01/16/2026	Unknown	Other	/Newton	SWRO	JW	Site Visit
Concerned Party: Anonymous Concern Info: Concerned party said there is an acrid burning smell coming from a nearby business. Concerned party was not certain, but thought it could be a trucking company. Maybe Trailer Connections or Bussey's Transport o Highway 43. [sic] Conclusions: CON-1214 I did not observe any violations during this investigation.								
64595	01/15/2026	01/15/2026	John Woods	Open Burning	Raymore /Cass	KCRO	DS	Phone Conversation
Concerned Party: Donald Babylon Concern Info: Concern party stated that John Woods is burning Styrofoam in a burn barrel in his backyard. [sic] Conclusions: Based on interviews with the concerned party and local fire department, the open burning consists of household waste and is not prohibited by department regulations.

64602	12/15/2025	12/18/2025	Osarone, Inc	Asbestos Underground Storage Tanks	Columbia /Boone	NERO	DB	Email
Concerned Party: Anonymous Concern Info: Email states, "former convenience store has been demolished. underground tanks may also still be in the ground. location is SW corner of Stadium Bld and Rock Quarry Road in Columbia. City of Columbia demo permits have language on NESHAP requirements." [sic] Conclusions: No violation of the asbestos rules was found during the inspection. It appears the asbestos notification was delayed in the mail. After site visit, I spoke with Paul Scheetz with Industrial Petroleum Environmental Services Inc. He informed me the asbestos inspection had been done and NF Ceiling Tile was abated by Gehm and the USTs were removed. He forwarded a copy of the mailed asbestos notification. The hardcopy notification was received December 30, 2025, dated October 20, 2025.								
64603	12/12/2025	12/16/2025	City wastewater lagoon	Odor	Bevier /Macon	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: Email states, "We have noticed a very strong, foul smell emitting from what we believe to be the city lagoons for the last few years now. The stench is so bad we cannot open our windows and even with the windows closed the smell gets into our home. I have been sick to my stomach many days because it's so bad and have had to avoid going outside some days. It's a pretty constant thing throughout the year up until the lagoons finally freeze during colder months. This has been reported to the city but no known action has been taken. Someone said that the city has been aware of this issue for awhile but cannot afford to fix it due to not properly maintaining the lagoon over the years. I'm concerned this will cause further health issues besides an upset stomach because the smell is so potent during most of the year. Area residents near the lagoon have the same complaints and concerns. There are even occasional days during the summer when you can be driving as far as the Old Hwy 36/Hwy C intersection (pretty far from the lagoons) and still smell this smell." [sic] Conclusions: No violation of the odor rule was found during the investigation. There may have been odors previously when the city pumped down the lagoons for the winter.								
64605	12/12/2025	12/16/2025	City of Bevier	Odor	Bevier /Macon	NERO	DB	Site Visit
Concerned Party: Chelsie Concern Info: Email states, "We live on heritage road and the smell from the sewage is so bad it makes us sick. We cant enjoy spending time outside with our kids or have family events because the smell is so bad. It would be nice to be able to open our windows when it's nice outside but cant because it makes us sick. The warmer the weather, the worse the smell. Apparently, the city of bevier hasn't been managing it properly and now we have to suffer from it. I have also worried about it causing health problems from breathing it in so much. Im not one to complain, im just hoping and praying this problem is controlled before the weather warms up next year." [sic] Conclusions: No violation of the odor rule was found during the investigation. At site, drove downwind of lagoons and found no wastewater odors. There may have been odors previously when the city pumped down the lagoons for the winter.								
64606	12/22/2025	01/05/2026	Jordan T Watt	Open Burning	Sedalia /Pettis	NERO	DB	Site Visit
Concerned Party: Gaylon Ritzo Concern Info: Email states, "Is it legal to burn insulation off of wire? The burning wire insulation smell is unmistakable. My neighbor across the road has been visited multiple times by our local fire dept. but burning stuff (at night) that creates a noxious odor still happens sometimes." [sic] Conclusions: No violation of the open burning rule was found during the investigation. Provided information. Observed burned household waste in barrel.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64610	01/16/2026	01/16/2026	Cape Girardeau County PWSD #4	Bacteria in Water Taste and Odors Particulates	Cape Girardeau /Cape Girardeau	SERO	MW	Phone Conversation
Concerned Party: Hector Vilanueva Concern Info: Received by email. CP States: The well used for PWSD#4 is faulty and contains sediment that causes bacterial growth in homes. This goes beyond the sulphuric smell. The water dept board is hiding the truth about who drilled the well and what the report said. The well drilled off of highway 25, near the corner of CCR 334 and Hey 25 has been causing illnesses and bacterial growth in people's pipes, toilets and ice makers. The well is a failure and chloronation is the least to be done. The water deot staff is not at fault. It's those in power who are hiding the truth. Please investigate this water issue and collect samples from as many addresses as possible. The water board has a select group of addresses and people that they use to fill up samples for testing. Some have water filtration systems in them or use a tap filter such as Pur. It's not right. People are going to keep getting sick. [sic] Conclusions: I investigated this concern (by phone) on the afternoon of January 16, 2026, with chief operator Tim Simmons. The CP only provided his email address, so I sent the following to the CP by email on 01/16/2026: Mr. Vilanueva, thanks for submitting your recent drinking water quality concern for Cape Girardeau County PWSD #4. The department has received and responded to several water quality concerns within the Willow Heights subdivision over the last several years. The subdivision has had past issues with suspected dead pockets of water, causing taste/odor problems and sediment/water discoloration problems. The supply has recently hired a very capable operator who has been working hard to improve the subdivision's water quality by changing the direction of water flow. In addition, future plans include installing a flush to waste hydrant to help freshen and improve the subdivision's water quality. It should be noted that the department investigated a very similar (anonymous) concern to yours on August 15, 2025, and water samples collected during the investigation tested safe. Also, it should be noted that the district has a routine sampling location at 170 China Blue and routine water samples were collected at this location on 8/18/2025, 9/3/2025, and 12/1/2025 and all three (3) water samples tested safe. So, bacteriologically, the water on China Blue appears to be safe. However, I do understand that the water quality does have issues at times, but as noted above, the district operator is working to improve things. On a different note, a final inspection of Well #3 on Highway 25 occurred on March 10, 2023, by department engineers and a final well construction approval letter was issued to the district by department engineers on March 17, 2023. Furthermore, a Compliance & Operation inspection of the district occurred on March 6, 2025, by a department inspector. Currently, the supply is in compliance with department regulations and is producing safe potable water. Please keep in mind, the department does not regulate taste, odors, sediments, and discoloration but we do regulate the safety of the water provided. Please feel free to contact me with any more questions or comments.								
64613	01/07/2026	01/14/2026	Graber Outdoors	Open Burning	Jamesport /Daviss	NERO	DB	Letter
Concerned Party: Barry Concern Info: Caller reports that driving by Graber Outdoors south of Jamesport he frequently sees smoke, sometimes it is white or black, and it smells like plastic or foam board insulation. [sic] Conclusions: Possible violation, issuing letter. At site, found burn site for wood. I observed unburned plastic wrap adjacent to burned material. Wood was untreated. Owner stated they only burn untreated wood, but workers sometimes put other stuff in the pile they shouldn't and he has to remove it. I informed him of the open burning rule and he said he would probably just get a dumpster.								
64617	12/30/2025	01/05/2026	Unknown	Odor	Sedalia /Pettis	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: Caller reports an odor in Sedalia that at first accumulated on clothes that later smelled bad, but has recently been stronger and noticeable in the air. States the odor is a layered stench like wet dog, rotten egg, and copper, somewhat like garbage but with a chemical smell also. Has noticed the odor when traveling between Bothwell Hospital and Limit Ave (East central to central Sedalia area), stronger towards the western area. Source unknown, speculated it could be a meat packing plant or the landfill or a factory. Winds at time of call were from the southwest at 13 mph. 43% humidity, 39F, clear. [sic] Conclusions: Drove by area described by complainant, found negligible odors, none of which were as described by complainant. No violation found during investigation.

64618	12/31/2025	01/05/2026	David Staus Family Trust	Open Burning	Smithton /Pettis	NERO	DB	Letter
Concerned Party: Anonymous Concern Info: Report states: "I drive buy and this farmer burns tires in his brush piles .. 32404 van dyke rd smithton mo" [sic] Conclusions: At site, observed no evidence of tires in brush piles when observing from road. Unable to contact at house. Met neighbor who said it is David's land and he has never seen him burn tires and has seen him let his brush piles dry for a couple years before burning and use a hay bale.								
64622	01/20/2026	01/23/2026	Midwest Organic Solutions midwestorganicsolutions@gmail.com	Odor Land Application	Jasper /Barton	SWRO	JW	Site Visit
Concerned Party: Alexandria Walker Concern Info: The following was submitted through online reporting: "This property is dumping human waste, and the sludge smell is awful. We live 2.5 miles north of this property. Our concern is the air pollution, water run off. Is this going to get into our water system, creeks, rivers etc. I have heard this company has no permits. This was a home property they have turned into a dump facility for human waste, they are just dumping it on the ground." [sic] Conclusions: CON-1244 I did not observe any violations during this investigation. No action is required.								
64630	01/21/2026	01/23/2026	Kinney Family Irrevocable Trust	Water Flow or Quantity Open Burning	Grain Valley /Jackson	KCRO	TC	Other
Concerned Party: Anonymous Concern Info: First noticed January 16, 2026. CP saw smoke behind the Lake Lotawana sewer plant about 80-90 yards directly east behind the plant noticed and went to check it out to make sure it was under control and when he walked back there, he saw that they were burning dead trees had dammed up the stream (Sni-A-Bar). He could not see any culverts to let the water out. He estimates it is dammed up around three feet, and the water is just going over it. [sic] Conclusions: No violations of the Missouri Clean Water Law and the Missouri Clean Water Commission were observed. The environmental concern was referred to the Kansas City District Kansas City Regulatory Office U.S. Army Corps of Engineers District, because the Missouri Department of Natural Resources does not have jurisdictional authority over work being conducted in waters of the state.								
64634	01/20/2026	01/21/2026	Unknown	Odor	Columbia /Boone	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: Online report states that Jan 15, 4:40 PM noted mild rotten egg odor near 4469 Brown Station Rd. [sic] Conclusions: Drove past, found no odors as described. Possible odor sources nearby include Ri-mor mulch and Columbia Landfill.								
64636	01/16/2026	01/21/2026	Unknown	Open Burning	Columbia /Boone	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: Online report states: "A neighbor at 260 N Sunny Side Court, Columbia, MO 65201. I. The side backyard visible from the street, they have a huge bonfire pile. Not only with wood and boxes, it has to 2 king mattress on it and other items not identifiable to me, but it's not wood or cardboard. They are placed the mattress on top of on against the high pile on January 15th or the night of the 14th. So I guessing they are getting ready to set it off. The 2 mattresses are small compared to the burn pile." [sic] Conclusions: At site, observed piled junk in back yard including household waste, wood, and a mattress. I observed it had not been burned. Nobody answered door. I left a voice message with the doorbell and left an informational package with a card, copy of OB rule, and fact sheet on OB regs.

64651	01/20/2026	01/22/2026	COOP Association #2	Agricultural Anhydrous Ammonia	Marthasville /Warren	CO	ES	Phone Conversation
Concerned Party: Emily Monzyk Concern Info: CP stated that MFA is expanding the site in to a much larger commercial storage/distribution center. MFA manager on site told the CP said there would be dust from moving fertilizer around the site, loading and unloading, as well as trucks entering and leaving the site. He also stated they will be selling large quantities of anhydrous ammonia in the near future so there would be several large tanks on site. CP asked about permits and was told by MFA site manager that they do not have any air, water, or any other permits and do not need them. CP is very concerned about the fertilizer and anhydrous ammonia on site and wants to make sure that the company is following state regulations. [sic] Conclusions: No anhydrous ammonia currently at facility but could be added in the future. Measured setback distances for potential storage tank with laser rangefinder. Proposed site would meet setback distances. Provided information on land disturbance permits as site likely needs a permit. SLRO investigating concerns for stormwater and air permits at site.								
64654	01/23/2026	02/03/2026	Freedom Industries LLC, mark.schwartzhoff@n8esentials.com	Odor	Belton /Cass	KCRO	CK	Other
Concerned Party: Anonymous Concern Info: Smith-Morgan Farms appears to be trying to operate a composting operation, but it looks more like a dump. Bringing in roll offs of fruits and vegetables and just dumping on ground; they are not turning material over like they should. Causing bad odors and vectors. [sic] Conclusions: The composting operation was producing minimal odors during the investigation. The temperature was below 40 degrees, so odors may increase as temperatures rise. The operations director explained that the business intends to purchase a piece of equipment to help turn over the compost, which should help with the odor and vermin.								
64655	01/21/2026	01/23/2026	Michael Cary	Other	/Jackson	KCRO	MU	Email
Concerned Party: Robert Fleming Concern Info: FOR IMMEDIATE RELEASE Kansas City, Mo. January 2026 In January 2026, a man was shot and killed in Kansas City, Missouri’s Northland—an outcome neighbors say was both tragic and preventable. For months prior to the shooting, residents had submitted repeated complaints through the City’s 311 system regarding a nuisance property tied to escalating safety concerns. According to public records and community accounts, those complaints were routed, delayed, closed, or transferred among multiple City departments without meaningful action. Neighbors contend the violence that followed was not sudden, but the result of a prolonged failure to respond to clear warning signs. The death has intensified long-standing concerns across Kansas City about systemic failures within the 311-reporting process and the City’s fragmented response to nuisance properties. Residents describe a pattern in which responsibility was repeatedly deferred among the Kansas City Police Department, Kansas City Fire Department, Codes Administration, Neighborhood Services, Animal Control, Waste Management, and City leadership—leaving neighborhoods vulnerable and residents increasingly frustrated. On Saturday, January 17, at approximately 12:31 p.m., Kansas City police responded to a “shots fired” call at 8801 E. 47th Street, Kansas City, Missouri 64129. Neighbors say the property has been the subject of more than six years of unresolved complaints submitted through the Kansas City 311 system. The property, owned by Michael Cary, has accumulated multiple code violations and has been repeatedly cited by residents as a nuisance property posing ongoing threats to public health and safety. Despite repeated reports involving trash and debris accumulation, raw sewage leaking from trailers, animal-related concerns, and suspected criminal activity, residents say the City of Kansas City failed to take sustained enforcement action. Complaints were passed among departments—including KCPD, Codes Administration, Neighborhood Services, Animal Control, Waste Management, and the City Manager’s Office—without resolution. See Power Apps concern for more information. [sic] Conclusions: Kansas City Public Safety Task Force currently working on the case.								
64658	12/19/2025	12/19/2025	Liquid Environmental	Odor	St. Louis /St. Louis City	SLRO	RA	Phone Conversation
Concerned Party: Brian Chastain Concern Info: We received an odor concern from the DNR website. The CP states: We suspect Liquid Environmental solutions - 6400 McKissock Ave, St Louis, MO 63147. We have dealt with the odor for a number of years and have complained numerous times. The odor is so bad at times that it effects our employees and visitors that are at our facility. We are confident that other businesses in the area are likewise affected. We respectfully request a resolution to the issue. [sic] Conclusions: No violations of Missouri’s Odor Regulation 10 CSR 10-6.65 were noted during my site visit.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64659	01/21/2026	01/21/2026	Columbia Bottom Conservation Area	Odor Open Burning	St. Louis /St. Louis	SLRO	AA	Referred to Other Agency
Concerned Party: Mary Budde Concern Info: CP stated that she lives over in Illinois and Columbia Bottom Conservation Area "The Bottoms" is burning sunflower fields. She stated that the smoke is very yellow/brown and has a strong odor. She is worried for her health and general air quality. She stated that she has to wear a mask outside and has to do asthma nebulizer treatments. CP would like a call back. I called the Spanish Lake Fire Dept. and they were not aware of a controlled burn there. This conservation area is also managed by MDC so I tried calling Jake from MDC who works there, I did not get a response. So I am unsure if it was an actual prescribed burn or not. [sic] Conclusions: The location of the open burning was in St. Louis County. I referred the concern to St. Louis County Dept. of Public Health. Aaron Cadman with St. Louis County APCP told me that MDC prescribed burning is exempt from their regulations. I reached out to MDC gave them the concern party's contact info and told them she would like a call back.								
64660	01/23/2026	02/03/2026	Donald Potter Jr	Scrap Tire Dump	Fair Play /Polk	SWRO	GE	Letter
Concerned Party: Chief Joshua Collom Concern Info: From Web: Donald Potter Jr resides at 209 N Elm in Fair Play. He has been observed to have a large quantity of car and truck tires there, in excess of several hundred. In Jan 22, I could smell the odor of burnt tires coming from the direction of his house, which actively had a fire going and smoke coming from the flue. No other fires were found in the area [sic] Conclusions: CON-1296 No scrap tire violations noted at the time of the investigation. An informational letter will be sent with scrap tire regulations and a technical bulletin on management of scrap tires attached. Photos are included within the letter.								
64664	01/23/2026	01/29/2026	NF Protein	Hazardous Air Pollutant Release	Nevada /Vernon	SWRO	BD	Report
Concerned Party: Clint Parker Concern Info: The caller states that they are employed at the Missouri Welding Institute and are experiencing a white tint, greasy/oily substance that is settling on employee's vehicles located at the facility and notice that the mist that is causing the issue is emitting from NF Protein located to the south of their facility. The caller states that they have driven by NF Protein on their way into work and the mist rolls over their windshield binds to it. When he runs his finger across the substance it smears. Other employees at the welding facility are experiencing the issue and it seems to be denser and greater in volume at overnight and in the early morning hours. [sic] Conclusions: CON-1291 A full compliance inspection was conducted in response to the concern submitted. The concerned party was updated with the results of that inspection, where filter changes were recommended to the facility. Site monitoring will continue if conditions persist.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64667	01/08/2026	01/12/2026	MFA Feed Mill	Fugitive Particulate Matter	Gerald /Franklin	SLRO	RA	
Concerned Party: Anonymous Concern Info: We received an call from a concerned party about his place of work. The CP called to complain about the Missouri Farmers Association in Gerald, MO. He was recently hired on as a Production Manager. Going through his training and being on site, he has become worried about the processing and handling of all the materials in the facility. The facility produces agricultural feed, adding drugs and vitamins to the food. The CP stated that the facility has no security, no training, no proper handling of materials, no chain of custody. He stated that employees keep animals, such as cattle at home. People are able to walk in and out of the facility and potentially could bring in or out anything they wanted. He was told to handle copper sulfate with bare hands. When he asked what to do about tingling in his hands after use, other managers told him to just wash his hands. There was no proper wash station (for eyes or whole body) and poor air quality. At time of interview, he had already called DHS and was waiting for a call back. He is planning on calling OSHA, EPA, FDA, USDA." The facility has an expired No Exposure Certification so I can do a site inspection next week. Fugitive Particulate Matter and Haz Waste Containers were listed as secondary concerns. [sic] Conclusions: I conducted a site inspection and did not find any air violations. A compliance evaluation inspection was conducted and a report will follow.								
64669	01/21/2026	01/21/2026	Bonackers Farm	Odor	House Springs /Jefferson	SLRO	CW	
Concerned Party: Kevin Duff Concern Info: CP stated that he lives close to Bonackers farms and he has concern regarding the odor that comes from the farm. He stated he is tired of the odor every day. He also stated that the facility processes human/animal waste and sells products such as mulch. I told him that we don't regulate agricultural operations. CP placed a concern last year (#13169 on 4/15/2025) and wanted to speak to the inspector from that investigation (Suzanne Lamb). [sic] Conclusions: No violations noted. I informed the CP that the cause of the odor was coming from a mulch fire, and that Mr. Bonacker had an action plan to stop it. CP mentioned that other odors occur off and on at the facility, but it is typically only on wet/rainy days that an odor really kicks up. I informed the CP that on such occasions to contact the Department as soon as possible in order to increase the likelihood of an inspector getting onsite for a reading while the odor is still present.								
64670	01/08/2026	01/09/2026	Gunther Salt	Fugitive Particulate Matter	St. Louis /St. Louis City	SLRO	JC	
Concerned Party: Ralph Thomas Concern Info: I received a phone call from a concern party about salt drifting from Gunther Salt and landing on neighboring property. He said his truck is covered with dust when they are operating. They had built a small containment wall near where they dump that is approximately 20 feet high, but when they offload from the railcar the dust will carry over the containment wall. [sic] Conclusions: A violation was recorded during the site visit. I will be issuing a RNOV for the fugitive dust emissions.								
64671	01/12/2026	01/13/2026	Unknown	Odor	/St. Charles	SLRO	MC	
Concerned Party: Joe Thompson Concern Info: We received two identical odor concern from the I-270/I-70 Odor Complaint Website. The CP experienced a strong sulfuric odor at his home. He states, "We arrived home around 9PM from Walmart. No odor as we carried bags inside. When we pulled trash caddy out a few minutes later strong sulfuric smell in the air. I looked on St. Peter's website but no notices." [sic] Conclusions: No violations were cited during the investigation.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64678	01/26/2026	01/29/2026	NF Protein Nevada Plant	Odor Particulates	Nevada /Vernon	SWRO	BD	Report
Concerned Party: Anonymous Concern Info: SWRO received a complaint forwarded from EPA Region 7, regarding an animal food processing plant located across the highway from the concerned party's workplace. The plant was identified as NF Protein Plant in Nevada, MO. For an extended period of time, this facility has produced extremely strong and persistent odors that affect the surrounding area on most days. So much odor that many of the concerned party's customers complain about the plants smell when they come in. In addition to the odor, on multiple occasions—including today—the facility's large smokestack has been emitting visible material that appears to settle onto nearby vehicles and surfaces. These emissions are leaving small speckled residue on windshields and parked vehicles surrounding the plant and even across the highway from the plant. This is not an isolated incident. Several people at the concerned party's workplace have noticed this happening repeatedly, and today their UPS driver specifically stopped to ask whether the speckled residue on their windshield came from the plant, as it was visible immediately after driving on the road in front of the plant. The UPS driver stated this was one of many occasions this has occurred. The combination of strong odors and what appears to be particulate fallout raises concerns about air quality, public health, and whether the facility is complying with its air-emission and pollution-control requirements. The concerned party is requesting that this facility be investigated for possible violations of air-quality and emissions regulations, including the release of particulates and odors that are impacting neighboring properties and workers. [sic] Conclusions: A full compliance inspection was conducted on 1/29/2026 in response to the concerns submitted. No odor violations were observed during the inspection, and opacity and fugitive dust concerns were addressed during the inspection. No further action is required.								
64679	01/26/2026	01/28/2026	Phil Joyce	Open Burning Odor Land Disturbance	Niangua /Webster	SWRO	JW	Phone Conversation
Concerned Party: Carolyn Bruce Concern Info: The Methodist Church is located at 117 N Elm St, Niangua, MO 65713. The burning is occurring at the property just South of the Methodist Church at the corner of S Elm St and W Madison Street. Concerned party states that their neighbor (Phil Joyce) is burning large piles of trees from his property. The concerned party mentioned that the Conservation department has been involved because Joyce encroached onto their land while taking down trees. The concerned party says that Joyce has cleared about 1 1/2 acres of land and is planning to put in pipes for their future RV park. The two large piles of trees are currently burning, and the flames are green and yellow. The concerned party states that there were old motor homes and RVs on the property that are likely being burned with the trees. The smoke has infiltrated the concerned party's home and smells like chemicals. The smell is causing the concerned party and their family to have migraines and feel nauseous. The concerned party states that they have called the police and the county and no action has been taken by them. [sic] Conclusions: CON-1306 I did not observe any violations during this investigation. No action is required.								
64681	01/08/2026	01/13/2026	Unknown	Odor	/St. Louis City	SLRO	MC	
Concerned Party: Daniel Hof Concern Info: We received an odor concern from the DNR webpage. The CP states In the Benton Park neighborhood of Saint Louis City, many residents reported a smell akin to strong chemical off-gassing or a serious electrical fire. The entire area was blanketed in the smell. Winds are less than 10kts out of the SSE. The winds lead me to believe a large emitter in the Sauget, IL area could be the culprit. The smell caused headaches and discomfort. Residents could not bear to be outside more than a few moments. The smell was not present at 730pm but was extremely strong by 955pm. [sic] Conclusions: No violations were cited during the investigation. The CP was provided information on odor regulations and contact information for any future concerns.								
64683	01/20/2026	01/22/2026	MFA	Fugitive Particulate Matter	Marthasville /Warren	SLRO	JC	
Concerned Party: Emily Monzyk Concern Info: CP stated that MFA is expanding the site in to a much larger commercial storage/distribution center. MFA person on site told the CP said there would be dust from moving fertilizer around the site, loading and unloading, as well as trucks entering and leaving the site. He also stated they don't have a plan for dust issues. CP asked about permits and was told by MFA site manager that they do not have any air or water permits and do not need them. CP is very concerned about the fertilizer dust reaching her property and into her home because it is so close to the expansion site. [sic] Conclusions: The plant is not constructed yet, but they hope to open it by spring 2026. No violations were observed.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64684	12/22/2025	12/23/2025	Engemann Trucking	Open Burning	Marthasville /Warren	SLRO	MC	
Concerned Party: Anonymous Concern Info: We received an anonymous open burning from the DNR website. The CP states an abandoned house at the intersection of Hwy 47 and Hwy D was burned down. [sic] Conclusions: No violations were sited during the inspection.								
64687	01/23/2026	01/26/2026	Carl Benedict	Open Burning Open Dumps Residential Waste Disposal	Hermitage /Hickory	SWRO	BD	Site Visit
Concerned Party: Anonymous Concern Info: Heather Peters received a call from a concerned citizen regarding what they believed to be homeless encampment near the intersection of State Highway 64 and County Road 323, Hermitage. The caller was reportedly not satisfied with how the case was being handled at the local level. On January 26, 2026 Randall Willoughby called the Hickory County Health Department and spoke with Jeff Owen. Owen relayed that they are aware of the concern however there is not a homeless encampment but rather a couple trailer houses that may or may not have water/sewer. The owner is reported as Carl Benedict and Owen further stated that Benedict will bring in material including mobile homes and burn it on-site. SWRO has investigated this individual before for similar issue. According to County GIS the property may not be owned by Benedict. The water/wastewater concern is under the jurisdiction of the local health department. [sic] Conclusions: CON-1311 The site is currently in enforcement, but no changes were observed with the site condition. Enforcement case managers have been updated on site condition. No further action is required.								
64689	01/28/2026	01/30/2026	Hansen Builders Inc	Open Burning Fugitive Particulate Matter	Sunrise Beach /Camden	SWRO	BS	Site Visit
Concerned Party: Krista and Dave Nicholas Concern Info: CP stated that the property across the street is being developed and they are burning construction debris and vegetation. The smoke is filling their house with ashy residue. They believe they are burning within 300 ft. of the nearest house. CP stated that they have photos and video of them burning. [sic] Conclusions: CON-1316 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required.								
64690	01/05/2026	01/13/2026	St. Louis Cremation Service	Odor	St. Louis /St. Louis City	SLRO	MC	
Concerned Party: Anonymous Concern Info: We received an email from the City of St. Louis APCP. The concerned party states: During their cremation you can smell foul fumes that come into our Lafayette square neighborhood. Especially when the weather is cold the fumes stay close to the ground and you can smell them when going for a walk. I request the city to take action and require abatement of the fumes. For example require a scrubber and air purifier. [sic] Conclusions: No violations were cited during the investigation								
64691	01/09/2026	12/31/2025	Duckett Creek Sanitary District Plant #1	Odor	St. Charles /St. Charles	SLRO	LZ	
Concerned Party: Anonymous Concern Info: We received an anonymous odor concern from the DNR webpage. The CP states: We live in Woodmere at the Bluffs near Plant #1 backing to Green Bottoms Road and the odor/smell is so intense it makes it hard to breathe just walking outdoors. After further investigation we have seen complaints of the smells going on for months now and know this is an older plant that is not using up-to-date odor control mitigation like modern membrane bioreactor used at one of your other plants. For the MANY residents surrounding this plant, please make this a priority as it is and will continue to cause health issues. We have young children that want to play outdoors and enjoy the lovely neighborhood. [sic] Conclusions: There was no odor during my walkthrough. No violation was noted at the time of the investigation								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64693	01/13/2026	01/14/2026	Elementis Specialties Inc	Odor	St. Louis /St. Louis City	SLRO	LZ	
Concerned Party: Zach F. Concern Info: We received a referral from the City of St. Louis Department of Public Health. The CP states: On Thursday, my neighbors and I noticed a strong, distant chemical smell in the air. These events have been occurring more frequently and with greater intensity. The smell is so strong that it burns the throat when breathed in. These events almost always occur in the late night/early morning hours. I suspect the smell is coming from Elementis Specialties, which has had several documented EPA cases of faulty equipment and leaks. [sic] Conclusions: No smell detected inside or outside the buildings at Elementis Specialties. No odor was coming from River Des Peres as the CP suspected. No smell in the surrounding area that was objectionable to me. No violations noted at the time of my visit.								
64694	01/12/2026	01/14/2026	Resident	Open Burning	De Soto /Jefferson	SLRO	PT	
Concerned Party: Anonymous Concern Info: We received an anonymous open burning concern from the DNR website. The CP states: the residents at 13975 Kingsland Rd, DeSoto, MO 63020 have been burning their trash several times a month. I saw it occur on 1/10/2026 but it has gone on since they moved in a year ago. They are burning diapers, plastic, and all manner of materials that are very toxic when burned and it is a hazard to the entire neighborhood. Noxious smoke drifts over to other properties and the dogs spread partially burned trash all over the neighborhood. [sic] Conclusions: We did not observe a violation at the time of the investigation. Compliance assistance letters and open burning fact sheets will be mailed to the current resident and the property owner.								
64695	01/13/2026	01/13/2026	St. Louis Cremation Service	Odor	St. Louis /St. Louis City	SLRO	MC	
Concerned Party: Anonymous Concern Info: We were referred an anonymous odor concern from Mary Foshase with the City of St. Louis Department of Health. The CP states: There are noxious fumes coming from the crematorium. There have been several reports of this and nothing is being done to investigate or protect the citizens health. [sic] Conclusions: No violations were cited during the investigation								
64696	01/14/2026	01/15/2026	Unknown	Odor	St. Louis /St. Louis City	SLRO	PT	
Concerned Party: Anonymous Concern Info: We received a referral odor concern from the City of St. Louis Dept of Health. The CP states: A strong smell at night from the companys on Hall St. The smell penetrates our clothes, skin, hair. During the day you don't smell it, but it is horrible at night. Proctor & Gamble, Mallinkrodt, etc... [sic] Conclusions: I did not detect any strong or penetrable odor at or near the source address.								
64699	01/13/2026	01/16/2026	Byrnes Mill Farm	Odor	Byrnes Mill /Jefferson	SLRO	GH	
Concerned Party: Karen Kranz Concern Info: We received an odor concern from the EPA. The CP states: We have been living with a pungent odor outside for months. It has been determined Byrnes Mill Farms, a trailer park within a mile from my location, is not fixing aerators in some sort of retention pond or sewer for the trailer park. This is causing a disgusting odor outside which is now throughout my house inside! We can no longer enjoy any time outside walking the neighborhood or even sitting in my own backyard! Last night the smell was so bad I was physically sick. This has gotten completely out of control. I have no photos as do not know exactly where it's located on a different property near me. I'm also unsure of how to properly reported violation method as I do know understand what the exact classification would be exactly. [sic] Conclusions: No violations of Missouri's Odor Regulation 10 CSR 10-6.65 were noted during my site visit.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64701	01/02/2026	01/07/2026	Champ Landfill	Odor Sanitary Landfills	Maryland Heights /St. Louis	SLRO	SH	
Concerned Party: Christine Hansen Concern Info: Christine Hansen called Jake from EER @ 5am to complain about the landfill gas smells/toxic gasses that had inundated her home. She stated that the gasses have gotten worse in 2025, and that she has lived in the area for decades. Hansen was concerned that she could not work from home and had to leave her home multiple times, over the holiday week, due to excessive smells. She was concerned that the ongoing contact was detrimental to her health and that she was having respiratory distress due to the exposure. Hansen communicated distrust and frustration with the regulatory ministrations of the site, and pointed to the many complaints, articles and studies that had been done over the surrounding communities concerns. She said that it should shut down until the gasses could be managed or to have the amounts changed. Hansen was adamant about her request that we regulators do more to assist with the issue. [sic] Conclusions: - 1/15/2026 SJH - After completing an odor loop (w/unactionable findings) and a conversation with Shawn Struckhoff (District Manager), I did not find an actionable odor reading. Struckhoff stated that Champ has been doing daily (often twice a day) odor readings at Hansen's home. Struckhoff stated that he has spoken to Hansen many times and has been trying to assist. At this point, there is no new follow up that can be done. I shared the option for having an odor sensor installed in your home, with Hansen. She seemed interested in the program. I have left Hansen a voice message and will explain the in-home sensor option and send her to Struckhoff to establish if that is her interest.								
64704	01/07/2026	01/08/2026	Residential	Open Dumps	St. Clair /Franklin	SLRO	JV	
Concerned Party: Anonymous Concern Info: I received a call from an anonymous caller who said there is a resident at 3351 Schuchart Park Road in St. Clair that is dumping furniture boxes of trash next to their house (west side) in a small pond. The Meramec River is less than 200 feet from the pond and when the pond floods it will go into the river. The caller also alleges that the wastes is sometimes burned. [sic] Conclusions: There was an open dump on site. A letter is being mailed to the property owners along with fact sheets on open burning and managing residential waste. Photos are attached to this form.								
64721	01/09/2026	01/15/2026	Kevin Pudenz	Open Burning	Harrisburg /Boone	NERO	JH	Communication In Person
Concerned Party: Joann Carey Concern Info: Caller reports that her neighbor Kevin Pudenz burned something on his property at approximately 6:00 PM January 8, 2025, that caused her extreme breathing difficulty and increased heart rate/blood pressure. The caller stated that whatever was burned created an intense rubber or oil odor. The burning takes place a couple times a year and it is believed that whatever is being burned is then being buried behind the westernmost barn. [sic] Conclusions: No violations of the Missouri Open Burning regulations were observed at the time of the investigation. No further action required to address this concern.								
64735	01/28/2026	01/30/2026	Residential Lot	Open Burning	Sunrise Beach /Camden	SWRO	BS	Site Visit
Concerned Party: Diane Cerveny Concern Info: Diane Cerveny called to report that a contractor, Hansen Builders, is land clearing and burning trees and brush illegally. The property is very small and less than 100 feet from other houses. The CP says the fires burn throughout the day and during the night and the fires are not supervised at night. She said we can see the fires and the entire property from the public road [sic] Conclusions: CON-1318 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64737	01/29/2026	01/30/2026	Hansen Builders of Jerseyville Illinois	Open Burning	Sunrise Beach /Camden	SWRO	BS	Site Visit
Concerned Party: Anonymous Concern Info: Caller stated that contractors had a brush fire at the address below. Additionally, caller stated that the brush fire was greater than 5 feet tall and occurred within 200 yards of an occupied structure. [sic] Conclusions: CON-1329 No violations of 10 CSR 10-6.045 Open Burning Requirements were observed during the site investigation. No further action is required.								
64746	01/26/2026	01/30/2026	Leland Eggerman	Agricultural Anhydrous Ammonia	Lockwood /Dade	CO	GB	Phone Conversation
Concerned Party: Keith Darden Concern Info: The National Response Center report states: "CALLER IS REPORTING A RELEASE OF ANHYDROUS AMMONIA FROM A FARM FACILITY. CALLER STATED THIS HAS IMPACTED HIS HEALTH AND HIS PETS AT HIS LOCATION. CALLER STATED HE HAS LOSS TWO PETS DUE TO THE RELEASE OF MATERIALS INTO THE AIR." The duty officer spoke to Eric Nold with the US Environmental Protection Agency who stated that he had contacted the reporting party and the reporting party had been in touch with the Department of Agriculture about this release and he was dissatisfied with the Department of Agriculture's response. Mr. Nold noted that the farm in question is also 3.3 mile away from the affected residence. [sic] Conclusions: Greg Brandt contacted Leland Eggerman Friday January 30th and discussed a concern of a release that occurred in the field of application. Leland stated that he had not had a release and was not aware of any concerns from neighbors. I discussed application of anhydrous ammonia to be sure proper application was being used and operating in a safe manner. Since Eggerman Farms is operated as a private farm they do not fall under the anhydrous rule.								
64777	02/02/2026	02/06/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Kelly Johnson Concern Info: Bad odor on Thorn road between county road 100 and 120, smells like sewage waste, does not smell like litter. Smelling for over a month and has not gone away. Consistent bad smell every day, morning and night [sic] Conclusions: CON-1347 No violations of 10 CSR 10-6.165 Restriction of Emission of odors were observed during the site investigation. Slight odors were present at the time of the investigation, but odors did not exceed the regulatory 7:1 dilution threshold limit.								
64778	02/02/2026	02/06/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Laura Earle Concern Info: Neighbor a mile down the road is producing bad odors on their property and it is getting worse. Can't go outside without gagging. Can be smelt from 3 miles away in Jasper. Caller is unsure what they are doing on the property, odor has been constant for over a month now, but today was the worst. Puke-y turkey litter smell, worse than turkey litter, acidic. Inside house is starting to smell. Noticed smell about two months ago, but wasn't bad or consistent until about a month ago and continues to worsen [sic] Conclusions: CON-1348 No violations of 10 CSR 10-6.165 Restriction of Emission of odors were observed during the site investigation. Slight odors were present at the time of the investigation, but odors did not exceed the regulatory 7:1 dilution threshold limit.

64795	02/02/2026	02/10/2026	Preserve Apartments	Open Burning	Branson /Taney	SWRO	BD	Other
Concerned Party: Gabriel Concern Info: The wooded area behind or beside the Preserve Apartments in Branson has a construction zone that has a burn pile. Concerned they are burning tires or something bad as the caller and their neighbors having difficulty breathing when outside due to the dark smoke in the air. Worried the smoke is dangerous as it is causing breathing issues and the smoke is dark [sic] Conclusions: CON-1335 The source of concern could not be determined during the site investigation. The concerned party will contact the department if they observe additional burning and will provide a more accurate location.								
64797	02/02/2026	02/06/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Frank Balster Concern Info: Odor smelt 4 miles away from new composting facility, Midwest Organic Solutions on 2/2/2026 at 445am and again 645am. Smelled like burnt feathers, burnt flesh smell [sic] Conclusions: CON-1343 No violations of 10 CSR 10-6.165 Restriction of Emission of odors were observed during the site investigation. Slight odors were present at the time of the investigation, but odors did not exceed the regulatory 7:1 dilution threshold limit.								
64811	12/12/2025	12/16/2025	Agri Genesis	Odor	Macon /Macon	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: I've noticed this for years but didn't know I could report it until today - need to report diminished air quality, there is a farming operation on Lake St in Macon, MO that doesn't just smell bad, it's causing me headaches. Whatever is going on there is just bad. [sic] Conclusions: 12/16 0900 at site, found odors strongest due north of gate just across road. Used Nasal Ranger, found 2:1 DT. Stopped by call box, discussed with operator that my supervisor wanted to meet with someone to discuss odor complaints.								
64812	12/12/2025	12/16/2025	Agri Genesis	Odor	Macon /Macon	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: Report states "The stink from the plant is really bad in thd city of Macon. Location is 424 Lake Street. But it stinks in the town of Macon" [sic] Conclusions: 12/16 0900 at site, found odors strongest due north of gate just across road. Used Nasal Ranger, found 2:1 DT. Stopped by call box, discussed with operator that my supervisor wanted to meet with someone to discuss odor complaints.								
64813	12/12/2025	12/16/2025	Agri Genesis	Odor	Macon /Macon	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: The awesome smell of marijuana when you drive into Macon almost every day. The smell is horrible most days [sic] Conclusions: 12/16 0900 at site, found odors strongest due north of gate just across road. Used Nasal Ranger, found 2:1 DT. Stopped by call box, discussed with operator that my supervisor wanted to meet with someone to discuss odor complaints.

Concerned Party: Sarah Concern Info: Report states "This has been an on going concern for quite some time however I didn't know it could be reported. The air in Macon and a large portion of the country surrounding it has a stench that makes it hard to breathe when outside. The smell enters the car through my vents making it impossible to run my air when it is extremely strong. I miss being able to enjoy going outside when the weather is nice. Can something please be done to keep the odor from taking over our beautiful town?" [sic] Conclusions: 12/16 0900 at site, found odors strongest due north of gate just across road. Used Nasal Ranger, found 2:1 DT. Stopped by call box, discussed with operator that my supervisor wanted to meet with someone to discuss odor complaints.								
64816	02/04/2026	02/06/2026	Sultany Trucking, LLC; Mike Sultany	Other	Kansas City /Platte	KCRO	TC	Phone Conversation
Concerned Party: Aimee Hilton Concern Info: Via Webform email Submitted at 5:41 pm Tuesday, February 3, 2026 - Date of Incident or First Noticed: 09/01/2025 Property owner has two large fuel tanks (likely diesel) on his property. Semi trucks and dump truck drivers are fueling up their vehicles at all hours of the day. There are neighbors next to the property owner. The property owner lends his property and provides fuel for what appears to be at least one commercial operation. [sic] Conclusions: No violations of the Missouri Clean Water Law and the Missouri Clean Water Commission were observed.								
64818	02/04/2026	02/04/2026	Rich Hill	Open Burning	Rich Hill /Bates	KCRO	MC	Email
Concerned Party: Merle Noll Concern Info: Via Webform email - Request for Assistance - Submitted at 7:52 am Wednesday, February 4, 2026. The entire town burns waste of all types in their yards. It's everyday somewhere here. There is a guy down the street that burns everyday on 6th Street. I have 2 Terminal Cancers and have to wear a mask every time I go outside here. [sic] Conclusions: I informed the concerned party and the City of Rich Hill that while the Missouri Department of Natural Resources has regulations on open burning, burning of personal household waste and vegetation are generally allowed. There are some exceptions, such as durable goods and burning household waste at sites with over four dwelling units (e.g. apartment buildings and mobile home parks). I provided our factsheet on open burning. The fire chief informed me that there is a local ordinance that bans burning of trash (http://www.richhillmo.com/2017/04/04/ordinance-no-1646-bill-no-647/). The fire department responds to calls for service related to potential illegal burning, and all fire department members are trained on the local open burn ordinance and enforce it as needed. The fire chief strongly encourages reporting any suspected illegal burning to Bates County Dispatch (the fire department's dispatching agency) at 660-679-3232. They will investigate all calls for service and make a determination based on the city ordinance. I provided the information from the fire department to the concerned party.								
64824	02/03/2026	02/05/2026	Rude Creations	Hazardous Air Pollutant Release	Springfield /Greene	SWRO	BD	Communication In Person
Concerned Party: Anonymous Concern Info: Caller is concerned the business does not have the appropriate air permits and is directly venting paint booths to the environment [sic] Conclusions: CON-1354 No violations of 10 CSR 10-6.060 were observed. The paint booth meets the exemptions outlined in 10 CSR 10-6.061(3) (Z) for body repair and refinishing of motorcycle, passenger car, van, light trucks, heavy trucks, and other vehicle body parts. Good housekeeping practices were observed and the facility has not circumvented the stack. No further actions are required.

Concerned Party: Joshua Joyce Concern Info: CP states that the property owners, who recently acquired the land in the area, are piling large amounts of municipal and animal waste at the location. He is concerned about the severe odor coming from the property and the potential negative effects to waterways in the region should this waste migrate off site [sic] Conclusions: CON-1359 No violations of 10 CSR 10-6.165 Restriction of Emission of odors were observed during the site investigation. Slight odors were present at the time of the investigation, but odors did not exceed the regulatory 7:1 dilution threshold limit.								
64829	02/03/2026	02/04/2026	Robert Sterner	Open Burning	Mountain Grove /Douglas	SWRO	BS	Letter
UF Concerned Party: Chris Hammett Volunteer Fire Department Concern Info: Chris Hammett with Eastern Douglas County Volunteer Fire Department contacted the spill line to report an open burning concern currently happening including tires, old trailers, and domestic debris. Hammett stated the owner started the fire and left the site unmanaged. The concern has been referred to the Missouri Department of Natural Resources Southwest Regional Office for further investigation. Tina White with SWRO was contacted and the concern was referred. EER Incident 260203-1000 CDW [sic] Conclusions: CON-1364 The improper disposal of demolition waste and durable goods through burning is in violation of Missouri Solid Waste Law and Regulations Section 260.210 RSMo. A letter of unsatisfactory findings was issued for the violations with a schedule of compliance.								
64830	12/19/2025	12/22/2025	City of Perryville	Asbestos	Perryville /Perry	SERO	BG	Letter
LOW, RTC Concerned Party: Brandon Ochs Concern Info: email from Senora Cressman: Good afternoon, I received an environmental concern from Brandon Mochs, telephone number 573-517-8280, email brandonmochs@gmail.com regarding a fire training exercise which took place at 901 Edgemont Blvd, Perryville, Missouri. I don't see that we received an asbestos NESHAP notification of demolition and renovation form for this one. He said this residential structure had asbestos siding, but that the debris has been removed, so I'm not sure whether we'll be able to prove the siding contained asbestos without samples. However, all structures involved in fire training exercises become institutional structures, so a demolition notification for the fire training exercise should have been submitted. The last fire training exercise notification received from the City of Perryville was in 2005. I asked about the dates, and Brandon Mochs said he would forward an email thread to me regarding this fire training exercise. I'll send it along when I receive it. Thank you, Senora Cressman Environmental Program Analyst, Asbestos Unit Missouri Department of Natural Resources, Air Pollution Control Program P.O. Box 176, Jefferson City, MO 65102 Phone: 573-522-9936 Find us on the web at https://dnr.mo.gov/air/business-industry/asbestos [sic] Conclusions: See Letter of Warning (LOW) dated January 28, 2026 for findings.

Concerned Party: Anonymous Concern Info: rec'd via email - cp states: I work for this company and for the past several months we have been in and out of compliance for our permit number for air pollutants as well as various safety concerns and violations. Our kiln set is constantly smoking out of the stack, out of the reheats and out of the kilns. We try to keep it from happening but the company won't repair the problems that are causing the upsets. We're not being taken seriously when we bring this to our bosses attention. Something needs to happen before something bad or worse happens [sic] Conclusions: Please refer to Notice of Violation (NOV) issued on January 20, 2026, and was assigned NOV #SE260001 for full findings and required actions.								
64833	12/23/2025	12/23/2025	Doe Run Buick Resource Recycling Facility	Other	Boss /Iron	SERO	BG	Site Visit
Concerned Party: Ashley Harris Concern Info: CP states that the RP is burning and has been off and on for the last 5 days. There is a chemical smell in the air from the burning and it is causing headaches. Smells like car batteries. [sic] Conclusions: On December 23, 2025, EPA Region 7 reached out to Doe Run Buick Resource Recycling Facility to check on operations at the site. The facility stated that operations had been normal with no malfunction or issues. EPA Region 7 reached out to the Southeast Regional Office to discuss the concern. Following the discussion with EPA Region 7, Jesse Evans, Environmental Supervisor, had a discussion with the concerned party. We discussed what would occur for the investigation, how that site operates and that they are allow to burn/smelt materials per their permit. We also obtained a description of the odor and where they lived to determine distance. On December 31, 2025, I conducted an odor investigation. I stopped at 3 places off of Doe Run's property: a pull off spot on Highway KK, a pull off spot on Highway 32, and the Country Store in Bixby, MO. There was an 8 mph WNW wind. I remained at each monitoring location for 5-10 minutes to attempt to detect the odor. I was unable to detect an odor at any of the monitoring locations.								
64834	12/23/2025	12/23/2025	Recycling Center	Open Burning	Boss /Iron	SERO	BG	Site Visit
Concerned Party: Anonymous Concern Info: The National Response Center report states: "THE CALLER REPORTED THAT A RECYCLING COMPANY IS BURNING CAR BATTERIES AND OTHER UNKNOWN MATERIALS, RELEASING HAZARDOUS FUMES INTO THE ATMOSPHERE. THIS HAS BEEN ONGOING FOR AT LEAST SEVERAL YEARS AND IS CREATING HEALTH CONCERNS FOR LOCAL RESIDENTS." [sic] Conclusions: On December 23, 2025, EPA Region 7 reached out to Doe Run Buick Resource Recycling Facility to check on operations at the site. The facility stated that operations had been normal with no malfunction or issues. EPA Region 7 reached out to the Southeast Regional Office to discuss the concern. On December 31, 2025, I conducted an odor investigation. I stopped at 3 places off of Doe Run's property: a pull off spot on Highway KK, a pull off spot on Highway 32, and the Country Store in Bixby, MO. There was an 8 mph WNW wind. 64835	12/29/2025	01/02/2026	Derek Glass	Other	Bragg City /Pemiscot	SERO	HC	Letter
Concerned Party: Anonymous Concern Info: Received by email. CP States: Derek glass has been cleaning out rent houses and storage buildings and dumping and burning the items on the property [sic] Conclusions: On January 2, 2026, a department team member visited the site. At the time of investigation, no individuals were on site to discuss the concern with. Photos were taken from inside the vehicle from the public road. I approached the main entrance of the house and left a copy of "Facts on Open Burning under Missouri Regulations - PUB 2047", "Managing Construction and Demolition Waste - PUB2045" , "Illegal Disposal of Construction and Demolition Wastes - PUB-2251" and "Management of Scrap Tires - PUB2056" While the burning of vegetative wastes and residential wastes are permitted under the Missouri Code of State Regulations, burning durable goods, trade waste, treated wood, and tires are not permitted. On January 8, 2026, Lyndsey Rightnowar an Environmental Specialist with the department's Southeast Regional Office joined me on the second concern investigation. We were greeted by Derek Glass who agreed to show us the burn pit. There was a large amount of burned cardboard and bits of clothing in the pit. Derek stated he did burn a mattress box spring and planned to scrap the metal. There is a large amount of material on site including wooden furniture, plastic products, mattresses and clothing. These materials would meet the definition of durable goods and possibly trade waste. I suggested that Derek begin to use a dumpster service rather than burn the material, Derek was open to the possibility and noted he does have a contact with a dumpster service. I provided Derek with the same documents and factsheets as provided in the last site visit and we left the property.								
64838	02/04/2026	02/06/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Daniel Ritchhart Concern Info: From an online form: "A business started operating at a neighboring farm without permits while dumping sludge and waste illegally. The smell from this causes nausea and headaches for my family and neighbors. We have telephone DNR without any resolution!!! NO PERMITS MEANS NO DUMPING SHOULD BE ALLOWED!!! I COULDN'T EVEN BUILD MY HOUSE WITHOUT A SEPTIC PERMIT? THIS NEEDS TO BE STOPPED ASAP!!! Thank you " [sic] Conclusions: CON-1376 No violations of 10 CSR 10-6.165 Restriction of Emission of odors were observed during the site investigation. Slight odors were present at the time of the investigation, but odors did not exceed the regulatory 7:1 dilution threshold limit.

Concerned Party: Susan Hutslar Concern Info: cp states: concerned for water source & air quality for new asphalt company going in behind the concrete company. It's already affected the trees to where they look 1/2 dead and don't look lively. Everyone is on well water, it's a small rural community and we don't know what they are putting back into the ground that's going into the water source. Also - there is hydro carbon aeromantics released into the air from the asphalt production/distribution and we think this needs to be looked into to make sure they are doing what they are supposed to be doing the right way. [sic] Conclusions: Upon receiving the concern, it was determined to conduct an inspection to evaluate the site's compliance with their construction permit. A minor recordkeeping error was observed and corrected during the site visit. For full details, please refer to the Unsatisfactory Findings Inspection Report issued to Ready Mix Concrete, LLC on January 9, 2026. I attempted to reach out to the concerned party on two separate occasions and left voicemails. No return call was received. The last call made was on January 8, 2026.

Concerned Party: Anonymous Concern Info: I live in the city of Jasper and 2 days ago a horrible smell hit town that I hadn't ever been noticed before. It was like chicken poop but worse, like diarrhea and it was outside on the breeze going through the whole town! I heard a property just a few miles east of town had sold and was being used as a dump site for solid waste from septic systems! This can't be alright! Living in a small agricultural community I am used to the "usual" fertilizer used around that will also come through town on the breeze but there was absolutely NO comparison between that and what I smelled for the first time 2 days ago. Completely and totally horrible! Please, please, please investigate! This small community begs you! [sic] Conclusions: CON-1386 No violations of 10 CSR 10-6.165 Restriction of Emission of odors were observed during the site investigation. Slight odors were present at the time of the investigation, but odors did not exceed the regulatory 7:1 dilution threshold limit.

Concerned Party: Kimberly Good Concern Info: New Report an Environmental Concern 73641 Environmental Concern 2/5/26: I work at Quikrete/Midwest Minerals rock quarry located at 350 SE 100 Rd, Jasper, Mo and this morning I noticed a strong odor that almost made me sick. It smells like an outhouse that is being used but has never been cleaned or maintained. I've noticed a similar smell in the past, but never as strong as this morning. I'm used to the smell of chicken litter being spread on the fields around my quarry, but this is a much different and nauseous smell. I'm in and out of my scale house and loader all day long, so staying inside to avoid the odor is not an option. I'm not sure where it is coming from but thought it should be reported and possibly checked out. [sic] Conclusions: CON-1387 No violations of 10 CSR 10-6.165 Restriction of Emission of odors were observed during the site investigation. Slight odors were present at the time of the investigation, but odors did not exceed the regulatory 7:1 dilution threshold limit.

64852	01/07/2026	01/08/2026	James Rudd	Other	Bragg City /Pemiscot	SERO	LR	Site Visit
Concerned Party: Anonymous Concern Info: Received by email. CP States: Burning old tires carpets and seats from a truck behind his shed that he it taking down the smell is really bad for me and my kids [sic] Conclusions: On January 8, 2026, Hayden Cassinger and I visited the reported location. A burn barrel and a few small burn piles were identified from the road. We approached the front door and spoke with Crystal Rudd. She stated that they only burn trash from their household and have previously hauled scrap tires and furniture to the transfer station in Kennett, Missouri. She allowed us to approach the burn piles where we saw what appeared to be both fresh and burned residential waste. A small pile containing burnt mattress springs and other scrap metal was observed; the materials were rusted and, according to Ms. Rudd, not from a recent burn. Ms. Rudd was provided fact sheets and contact information for the department: Open Burning Under Missouri Regulations (PUB2047) and Management of Scrap Tires (PUB2056).								
64860	02/06/2026	02/10/2026	City of Lone Jack Waste Water	Other Odor	/Jackson	KCRO	HM	Phone Conversation
Concerned Party: Jennifer Wiseman Concern Info: The caller explained last night they experienced overwhelming sulfur odor coming from the lagoon. They get occasional odors but this was so bad they called the after hours number to the lagoon and the aerators were turned on and the fire department responded to their home. The firefighters experienced the strong odor as well. The odor was gone this morning. They were instructed to close their ventilation to the outside and stay in their house. The odor has been strong before but this was the strongest it's ever been. [sic] Conclusions: No further action needed. Odor was present from the lagoon due to weather, ice, and aerators being off. Cause of odor was a one time event.								
64861	02/06/2026	02/10/2026	Missouri Manufacturing, Inc.	Other	Urlich /Henry	KCRO	CK	Other RTC, UF
Concerned Party: Anonymous Concern Info: Large piles of sawdust. Sawdust also gets on the sidewalks, covers cars, and hangs in the air. It's especially bad when the wind is from the north. [sic] Conclusions: Missouri Manufacturing was found in violation of the fugitive dust regulation. By removing the dust collector and bypassing the dust collection portion of the ventilation system for the wood shop, the system was emitting sawdust out of the collection building and the wind was blowing it past the property boundary. Missouri Manufacturing will be issued Unsatisfactory Findings and must provide a correct action response.								
64862	02/04/2026	02/05/2026	Agri Genesis	Odor	Macon /Macon	NERO	DB	Site Visit
Concerned Party: Anonymous Concern Info: "My complaint is the marijuana plant in Macon. My kids attend Tri-County Christian School and I absolutely think its ridiculous that the students are not allowed to play outside due to the smell let alone the students smelling like it if outside for a period of time. I do not feel the staff, or students should have to smell it let alone not be able to be outside due to the awful smell. Staff and students alone complain. Spring/Summer is approaching and that is our worst time! Its upsetting to all families! I personally would of placed a complaint years ago, but I didnt know the right direction to file a complaint until now. This is a yearly complaint and I know multiple families that will file a complaint too." [sic] Conclusions: No violation of the odor rule was found. Checked with nasal ranger when departing and returning to the office, found 2:1 DT at 0810 in the morning, 4:1 at 1540 in the afternoon.

Concerned Party: Glenda BeDell Concern Info: New Report an Environmental Concern 73586 Environmental Concern 2/5/26; I've noticed for the last 68 months since I've been in Monett the pollution or smog for such a small town and black, bellowing small in many areas where around where I live and that they have a lot of cranes working the trees making the trees look bigger taller, and it's hard sometimes to breathe and I noticed what brought me first to understand this was I thought that it was constantly foggy and I know this area. I grew up Marionville and it's not foggy every day and it's always foggy in the morning, especially and it is white fog, but I noticed that by the as the day progresses, it turns into black fog or black smoke and it's a quiet chance I live or where I noticed it. The mouse is around the low income area of senior housing on Pine Street and it looks like it's the whole town but it's not so much on the north side or looking towards the north west but sure is on the southwest side and go to the south and there's some on the north east side, but it's really really apparent coming from the south side south Central and south eastern southwestern whole south I think I've got the directions right Highway 60 W. to Monett, Missouri Missouri from Springfield Missouri [sic] Conclusions: CON-1389 No environmental concerns were alleged in the concern. The concerned party has been provided information regarding what is regulated by the department, and what is not regulated.

Concerned Party: Matthew Newma Concern Info: New Report an Environmental Concern 73646 Environmental Concern - 2/5/26 - Jasper County: Continued illegal dumping of sludge for a composting business. No current permit, horrendous odor for a 3+ mile radius, no visible runoff barriers with water runoff from that property going directly to Coon Creek. Odor affecting numerous residences and multiple businesses [sic] Conclusions: CON-1390 No violations of 10 CSR 10-6.165 Restriction of Emission of odors were observed during the site investigation. Slight odors were present at the time of the investigation, but odors did not exceed the regulatory 7:1 dilution threshold limit.								
64865	02/05/2026	03/06/2026	Triumph Foods, LLC	General Water Quality Odor	/Hickory	SWRO	BM	Other
Concerned Party: Lora Grandestaff Concern Info: Caller says that the responsible party is hauling in truck loads of a slurry that smells really bad, from St. Joseph, MO to Hickory Co. and spreading it on a property right next to a creek. She is concerned about the runoff and the smell. [sic] Conclusions: CON-1392 There were no water quality problems or violations of the Missouri Clean Law regarding this specific concern.								
64868	12/11/2025	12/16/2025	City of Linn	Open Burning	Linn /Osage	NERO	DB	Letter
Concerned Party: Anonymous Concern Info: Report states "City of Linn Maintenance department burned about 10-15 yards of construction debris from a building destroyed at the city park. Waste has been sitting there for roughly a month. Property is owed by the city of Linn, waste was dumped by the city and burned by the city. Burning is happening right now. Usually a location used for burning of green vegetative waste." [sic] Conclusions: At site, found burned brush and separate pile of brick, concrete, metal with brush about 15' across. Non-clean fill demolition waste appeared to be negligible. I called and spoke with Aleksander Rowinski, who came to the site with Rob. He informed me that three loads of clean fill had been brought out to the site and dumped at the brush site rather than the nearby clean fill site and had been comingled with burned brush due to miscommunication. Sending informational letter.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
64869	02/03/2026	02/03/2026	Greens 34 Flea Market	Other	Piedmont /Wayne	SERO	BC	Phone Conversation
Concerned Party: Anonymous Concern Info: rec'd via email - cp states: I live on highway 34 close to trinity church. For the last 4 or 5 nights I have had to avoid going outside because there is a horrid smell that made me think my house or my in laws house was on fire the first few nights. I spent over 2 hours in single digit number temperatures searching to make sure as i have kids. My friends have clients on oxygen, and it is messing with their breathing. I have been told that it is a controlled burn by Wayne County coming from behind Greens 34 flea market. However, I do not know how true that is. I do know that on the morning of February 2nd on my way to work I noticed a fire behind the building and the smell was horrid. My car windows were up, and my heat was off and I got so choked up that I almost wrecked my car just passing through the smoke. I am concerned for my children's health as well as my own as i have heart troubles and sometimes difficulty breathing due to them and this smell is making it worse. Please investigate and find out what they are burning as it cannot be good for anyone within a 10-mile radius of the place. [sic] Conclusions: On February 3, 2026, I spoke with Logan from the Wayne County Sherriff's office and inquired about the report of fire. Mr. Logan stated they received multiple calls about the fire and dispatched Clear Water Fire Department. He stated the CAD report stated it was a brush fire not a controlled burn. Mr. Logan stated their CAD did not state anything but brush was on fire. He provided me with contact information for Earl Mumper with the Clear Water Fire Department to further discuss on site actions and obtain a copy of the fire report. I spoke with Mr. Mumper the same day about the fire in question. Mr. Mumper stated that the property owners were burning brush piles on the property and were unaware of some old leather cut pieces from an old hat factory under the brush piles. He stated the Clear Water Fire Department put the fire out and were going to assist the property owner with removal of the leather from the brush piles for proper disposal. Mr. Mumper stated the previous property owner worked at a hat factory that closed approximately 20 years ago and must have left the leather under the brush when they sold the property. He stated the property owners were not aware the leather was there and they informed them on proper disposal of the leather. Mr. Mumper also provided the fire report for the call the fire department received. I thanked him for his time and ended the call.								
64872	02/06/2026	02/06/2026	Midwest Organic Solutions	Odor	/Jasper	SWRO	BD	Phone Conversation
Concerned Party: Kate Concern Info: Forwarded from EPA "I live in the city of Jasper and 2 days ago a horrible smell hit town that I hadn't ever been noticed before. It was like chicken poop but worse, like diarrhea and it was outside of the breeze going through the whole town! I heard a property just a few miles east of town had sold and was being used as a dump site for solid waste from septic systems! This can't be alright! Living in a small agricultural community I am used to the 'usual' fertilizer smell used around that will also come through town on the breeze but there was absolutely NO comparison between that and what I smelled for the first time 2 days ago. Completely and totally horrible! Please, please, please investigate This small community begs you! [sic] Conclusions: CON-1409								
64874	01/22/2026	01/30/2026	Jackson Brothers	Open Burning	Moberly /Randolph	NERO	DB	Letter
Concerned Party: Anonymous Concern Info: Caller reports black smoke that smells like plastic or rubber coming from the Jackson Brothers Vending Machine business behind the building in the field they have fenced in. Caller believes they are burning tires or something like that. [sic] Conclusions: At site, discussed with Billy Dearing. He showed me the site, I observed brush pile with minimal other material visible. He said they had bought the field and were clearing off the brush and hadn't noticed the non-brush material. He stated they have no more burns planned. Sending info letter.

64878	02/09/2026	02/27/2026	Hillshire Bran - Tyson food	Industrial Stormwater Water Discoloration Odor	St. Joseph /Buchanan	KCRO	JJ	Site Visit
Concerned Party: Robert Young Concern Info: Farmland runs up to county line north of Mitchell Avenue. We have a drainage ditch that runs through our property and drains into the 102 River. Tyson foods/ Hillshire farms factory is on the city limit or west side of our property line within the city limits of St. Joseph. We are having problems with their wastewater coming from their plant that runs into our drainage ditch and contaminating our water and running into the 102 river. The contamination is bad enough that it plugs up our stand pipe and that drains water to the 102 River. The water coming out of the plant last spring was black tar like and cloggs up the drainage holes in the stand pipe. I recently went out and looked at the water. There is still an oily film on the surface of the water coming out of their plant two Fridays ago maybe January 23. I don't want any contaminants running through our property. We have springs on our property that is clear water going to the drainage ditch. The water coming out of Tyson is gooey black stuff with a strong odor. [sic] Conclusions: No further action required.

64896	02/11/2026	02/11/2026	Pied Creek Pump Station	Other Odor	Kansas City /Platte	KCRO	LN	Email
Concerned Party: Stevie Mulsoff Concern Info: Via KCRO Inbox - Sent: Wednesday, February 11, 2026 8:10 AM To: Cleanwater@dnr.mo.gov; KCRO@dnr.mo.gov; water.communications@kcmo.org Subject: Ongoing Odor and Long-Term Bypass at Pied Creek Pump Station Affecting Nearby Residences Hello, I am writing to formally raise a concern regarding the Pied Creek wastewater pump station near my residence. Since moving into my home, almost a decade ago, there have been above-ground hoses running through the wooded area to the pump station. Based on my understanding, these appear to function as a bypass or temporary force main. However, these hoses have remained in continuous use for the entire period I have lived here. In addition, there is a persistent wastewater odor in the area. The odor is present regularly, and has been an ongoing quality-of-life issue. Not an occasional or event-based occurrence. I am requesting clarification on the following: -Why a bypass or temporary wastewater conveyance has been in place for so long? -Whether this configuration is considered temporary or permanent by the City? -What odor-control measures are currently installed or planned at this station? -Whether this pump station is scheduled for repair, replacement, or inclusion in a capital improvement project? -In 2023, approval was passed for expansion and rehabilitation. What was done for improvement? Given the duration of the bypass and the ongoing odor, this appears to be a long-term infrastructure condition rather than a short-term maintenance issue. I am concerned about both the health implications and the impact on nearby residents. There are children who play in those woods and creek. Over the span of one summer, a group of kids in the surrounding residents found at least 7 dead turtles, in and around the creek that flows alongside the facility. This leads us to believe there are more than just odor environmental issues going on here. I am concerned about potential impacts to local water quality and wildlife as well. I would appreciate a written response outlining the status of this facility and any plans to address the bypass setup and environmental concerns. Thank you for your time and attention to this matter. [sic] Conclusions: Adrian Hall with Kansas City met with the concerned party to address her concerns.

64906	01/05/2026	01/05/2026	5 Star Demo	Fugitive Particulate Matter	St. Louis /St. Louis City	SLRO	PT	
Concerned Party: Ahman Al-Alim Concern Info: Mr. Ahman Al-Alim called into our office to report that there was a residential building being torn down next to his house and it was getting dust all over his property. He mentioned that he had previously called in a concern about a building on the other side of his house being torn down and it was the same company that is doing the demolition. [sic] Conclusions: 01/05/26: RLA - We have had two previous concerns relating to 5 Star Demo and Cora Ave (Power Apps 113 and 503) 01/05/26: PPT - Jenna Carter and I arrived at Cora Avenue around 9:30 in the morning. We walked along the block in front of the source property and the alley behind the source property. We observed an unoccupied excavator parked near the source property and a "Five Star Demo" lawn sign. We did not observe any active demolition or fugitive dust at the time of the investigation, and we did not encounter any Five Star Demo employees during the investigation. Conclusions We did not witness active demolition or observe fugitive dust at the time of the investigation.								
64912	02/10/2026		Kerry Batten	Other	Qulin /Butler	SERO	JW	Referred to Other Agency
Concerned Party: Anonymous Concern Info: Received by email. CP States: Is there any assistance available to help clean up Qulin? Environmental clean up. Specifically D&D Concrete, remove safety hazards, debris and waste. [sic] Conclusions: On February 11, 2026, I contacted Carlee Decker, City Clerk for the City of Qulin. I advised the concern received and additional references of open burning on the property. Ms. Decker was aware of the property and past efforts. However, at the time of past efforts, the property was not within the city limits but appears it has been annexed. She advised the property is utilized for various odd jobs. Ms. Decker confirmed that the city has ordinances regarding open burning and waste, and that their law enforcement would investigate accordingly. I provided an email with information of the anonymous concern and links to the department's publications: Managing Construction and Demolition Waste, Facts on Open Burning, and Managing Recovered Materials. Ms. Decker called back advising that a discussion occurred with Mr. Batten, in addition to providing publications. She provided my name and number to him, and he reached out. He advised that he conducts scrap metal recovery, but referenced plans to get out of the business. I advised regulations pertaining to solid waste management, open burning, and managing recovered materials. I discussed what is allowed for open burning (advising no furniture), in addition to what can be brought back as part of recovered materials. I told him he must meet city ordinance requirements, and regulations outside of city limits. I advised that the City of Qulin could reach out to the department if future efforts warrants additional assistance. The source of concern was updated based off discussion with Ms. Decker. It was listed prior as unknown.

64935	02/11/2026	02/19/2026	Double O Organics	Odor	/Lawrence	SWRO	JW	Phone Conversation
Concerned Party: Parker Shoen Concern Info: The CP states that a property located at 1944 Lawrence 1100 (Double O Organics) is receiving and processing waste that is producing a foul odor. He stated that he has not experienced an odor this severe in the area before and is worried about volatile particulate matter that may exacerbate his pre-existing respiratory issues. The CP stated that he notices this odor on Monday evenings. He has recently purchased a property between the 2190 and 2180 block of Lawrence 1100 and has noticed the odor at this location (see GPS Coordinates below). The CP would like a call back with the results of the investigation. [sic] Conclusions: CON-1495 I did not observe any violations during this investigation. No action is required.								
64939	12/30/2025	01/06/2026	Railroad engine exhaust	Odor Hazardous Air Pollutant Release	Union /Franklin	SLRO	SH	
Concerned Party: JD Kelley (Union City Engineer/Public Works) Concern Info: D Kelley called to report a concern that was sent to him from a resident of Union. The concern is that, due to the fact that the railroad has three different stops in the town of Union, the engine idles for hours. The concerned party stated that the engine idles near 1121 Old County Farm Rd., Union, MO.: north of the railroad office. Kelley stated that the railroad has had other issues in Union, but that the engine exhaust is the current concern. Kelley stated that he did a site visit to confirm and that the exhaust was noxious. He stated that he thought that the railroad was transporting coal products back and forth through town and that is why the engine idles so long. Kelley also stated that he thought that there was a railroad office south of the CP's address. I could not find one on the map. [sic] Conclusions: DNR does not regulate emissions from locomotives. I talked to the CP and let him know that the EPA has the authority.								
64951	02/11/2026	02/20/2026	Midwest Organic Solutions	Odor	Jasper /Jasper	SWRO	BD	Phone Conversation
Concerned Party: Gideon Buchanan Concern Info: They are dumping waste on this property and it smells horrible. You can see the piles of it and you can smell it from miles away. It has to be leaking into our water tables. It is disgusting. You can smell it at homes for miles around this property and it's awful when you drive by also. We are honestly concerned about our well water being contaminated. Numerous community members have called and complained. [sic] Conclusions: CON-1463 No violations of 10 CSR 10-6.165 Restriction of Emission of Odors have been observed after multiple site investigations.								
64962	02/11/2026	02/19/2026	Carl Bunch	Open Dumps General Water Quality	Conway /Dallas	SWRO	MK	Site Visit NOV
Concerned Party: Anonymous Concern Info: My maps show the location as 37°30'08.1"N 92°57'18.7"W - on the west side of Jones Creek Rd, charity mo. , they have cleared a patch of trees all the way down to the bank using equipment similar to a skid steer and continually pile and push trash off into the creek [sic] Conclusions: CON-1459 I will discuss with the details of the investigation with Carl Bunch once contact is made. I will inform him that he has 30 days to clean up the trash and properly dispose of it at a landfill or transfer station and provide receipts. A Notice of Violation will be issued illegal disposal of solid waste and open burning. SEE NOV FOR DETAILS AND PHOTOS

64992	02/05/2026		Bon Lou's Pet Grooming Salon	Odor	St. Louis /St. Louis City	SLRO	LZ	Phone Conversation
Concerned Party: Joshua Hanke Concern Info: We received an odor concern from the I-70/I-270 Area Online Odor Concern website. The CP states: I am reporting air contaminant nuisance from a commercial hair salon located at 1900 McCausland Ave, St. Louis, MO. Strong chemical odors; and burning hair from salon treatments are regularly detectable inside my residence, and outside my building entrance. The building has shared basement air pathways, and when my HVAC operates the fumes become stronger indoors, suggesting migration of air contaminants into residential living space. I believe there is NO active ventilation system present. This has been ongoing for over a year and has coincided with recurring nosebleeds and irritation. Local contacts have not resolved the issue. Request investigation of VOC emissions and ventilation/exhaust. [sic] Conclusions: I arrived at the facility in am hours of Feb 10, 2026. I walked around 1900 McCausland Avenue. At the back is the entrance to apartment where the CP resides. The door was closed he was not in the apparent at the time of my visit. I went inside the hair salon and met Ms. Ronisha Armstrong, hair treatment specialist there. I told her the purpose of my visit. I also went into the Pet grooming salon next door. I met the owner of the pet grooming salon and told her the purpose of my visit. There were no chemical odors from both salons at the time of my visit either inside or outside the building (front and back). Conclusions No violations noted at the time of inspection.								
64993	02/03/2026	02/03/2026	Bob Bell	Open Burning	Steelville /Crawford	SERO	TT	Phone Conversation
Concerned Party: Anonymous Concern Info: rec'd via email - cp states: A house was illegally burnt down by the owner, with possible asbestos siding and other items inside the home. [sic] Conclusions: On February 3, 2026, Bobbie Clark and I called the city of Steelville and spoke with city supervisor, Jason Evans. Mr. Evans stated the fire took place on February 2, 2026, and resulted in a total loss of the home. He stated he had been on site and viewed the property. Mr. Evans stated there was nothing left for disposal and the property owner was already working on cleanup. On February 4, 2026, Bobbie Clark and I drove by the site and observed that work on the property was already in progress. The foundation of the home had been broken up and placed near the road. We did not observe any items that needed further disposal. It appeared to us the house was a total loss. The city is aware of this location and will conduct any future follow up if necessary.								
65007	01/08/2026	01/12/2026	MFA Feed Mill - Gerald	Unpermitted Facility Fugitive Particulate Matter Hazardous Waste Containers	Gerald /Franklin	SLRO	HJ	
Concerned Party: Dakotah Kempf Concern Info: The CP called to complain about the Missouri Farmers Association in Gerald, MO. He was recently hired on as a Production Manager. Going through his training and being on site, he has become worried about the processing and handling of all the materials in the facility. The facility produces agricultural feed, adding drugs and vitamins to the food. The CP stated that the facility has no security, no training, no proper handling of materials, no chain of custody. He stated that employees keep animals, such as cattle at home. People are able to walk in and out of the facility, and potentially could bring in or out anything they wanted. He was told to handle copper sulfate with bare hands. When he asked what to do about tingling in his hands after use, other managers told him to just wash his hands. There was no proper wash station (for eyes or whole body) and poor air quality. At time of interview, he had already called DJS and was waiting for a call back. He is planning on calling OSHA, EPA, FDA, USDA. I explained to him what the SLRO Water unit regulates. The facility has an expired MONX permit. I explained that the materials inside could be regulated by both SLRO hazardous waste and air units. [sic] Conclusions: Inspected for stormwater compliance and issued inspection report/UF.

65012	02/18/2026	02/13/2026	Joey Ramsey	Open Burning	Neosho /Newton	SWRO	JW	Other
Concerned Party: Emily Bailey Concern Info: Burning household trash on a daily basis. Smells of burning plastic [sic] Conclusions: CON-1548 I did not observe any violations during this investigation. No action is required.								
65027	01/05/2026	01/06/2026	Ron Lacy	Other	/Stoddard	SERO	JE	Communication In Person
Concerned Party: Anonymous Concern Info: rec'd via email - cp states: "The anonymous caller referenced a previous concern entry that referenced the improper disposal of waste from the demolition of Dimension Church in Dexter (Stoddard County). Based off discussion, the concern was identified as Concern 823. The anonymous caller stated that demolition activities related to the Dimension Church in Dexter (Stoddard County) are resulting in waste being removed from the property and being taken to property owned by Ron Lacey. The property is located on Novella Drive in a forested area (on the left) north of a new building construction, north of Front St and Hwy 60. Waste was dumped and burned on this property. The burning of waste occurred on January 3, 2026. Hauling activities of the waste occurred on December 24, 2025 and other dates. Further statements were referenced that potential waste is being buried on the property of Dimension Church." [sic] Conclusions: On January 6, 2026, a site visit was conducted. I was accompanied by Lyndsey Rightnowar and Tiffany Terrell, Environmental Specialist. We first conducted a drive by of Novella Drive and no open burning was observed. We then visited the property where the demolition was occurring (reference Concern #823) and I met with Ron Lacy. I inquired about the other property and asked about any open burning, Mr. Lacy stated that they had been burning vegetative waste from where they were clearing off some brush as well as some of the untreated wood from the demolition. He then provided approval to visit the site and observe the burn spots. We visited the property, and it did not appear that any material had been buried, but burn piles were observed. No prohibited materials were observed in the burn piles. Based off the burn locations, the distances to nearby residences would be close to the 200 yard minimum requirement. I advised Mr. Lacy that ideally he would just burn vegetative waste generated on site.								
65041	02/11/2026	02/19/2026	Brandon May	Open Dumps Open Burning	Centralia /Boone	NERO	BH	Letter AC
Concerned Party: Kim Burrell Concern Info: On February 11, 2026, the Northeast Regional Office received a concern stating that Brandon May, who owns the property north of 17440 Barnes Road, near Centralia, has a burn pile approximately 10 feet by 12 feet in size. Reportedly, the pile primarily consists of brush, but has regulated waste consisting of demolition waste and an old sectional in it. The concerned party stated that the demolition waste appears to be part of an old deck. The caller stated that Brandon May attempted to burn the waste on February 7th, but was unable to get the pile to burn. The caller is concerned because the burn pile is approximately 30 yards north of their stables. [sic] Conclusions: Minor violations of the Missouri Solid Waste Management Law and Regulations were determined. At the time of the investigation, Brandon May had dumped a small quantity of treated lumber and plywood in a brush pile for disposal. On February 27, 2026, Brandon May submitted a sufficient response showing that the lumber and plywood had been removed and properly disposed of. An information letter will be mailed to Brandon May, discussing the Missouri Solid Waste Management Law and waste management practices. No further response required.								
65042	01/16/2026	01/19/2026		General Water Quality Public Water System Operations Other	/Jefferson	SLRO	JW	
Concerned Party: Whitney Lammert Concern Info: Whitney Lammert submitted online concerns to the DNR webform on January 16, 2026, January 17, 2026, January 18, 2026, January 19, 2026, January 21, 2026, February 2, 2026, and the Consumer Complaint submitted to the Attorney General's Office on January 26, 2026 (attached). [sic] Conclusions: The department does not intend to conduct a concern investigation at this time due to the nature of the concerns and lacking jurisdiction. Online resources and answers to Ms. Lammerts questions were provided in a phone call and follow up email.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65045	01/20/2026	01/08/2026	YES Byrnes Mill, LLC Wastewater Treatment Facility	Odor Minor Wastewater Facility	/Jefferson	SLRO	CM	
Concerned Party: Anonymous Concern Info: Online concern form received: "Byrnes Mill Farms Lagoon is causing environmental issues within the residents in the trailer park as well as surrounding residents. It has been addressed to the property manager multiple times that the smell is outrageous as well as the health concerns that are coming with it. As they are increasing those residents p a d rent they are not fixing the issues that are becoming hazardous to the people not only in the subdivision but the people in the surrounding area" [sic] Conclusions: I have been communicating with the facility owner. They have ordered new aerators and expect them to be installed in mid-February.								
65061	02/04/2026	02/11/2026	Dry Creek Lumber	Open Burning	Sullivan /Franklin	SERO	JE	
Concerned Party: Alan Mocabee Concern Info: We received an open burning concern over email about a facility allegedly burning wood products that are coated with polyurethane. The CP states: Dry Creek Lumber at 10875 North Service Road Sullivan MO manufactures high end wood products that are coated with polyurethane. These photos were taken tonight at 10:00PM. A couple time a week they incinerate the Polyurethane scraps and off fall. It is thick black smoke and makes it hard to breathe. The air quality in our building next door is reduced to the Oder. [sic] Conclusions: At this time, Dry Creek Lumber have not violated any construction permit requirements or 10 CSR 10-6.220 regulations.								
65073	01/20/2026	01/20/2026	Unknown	Other	/St. Francois	SERO	JE	Referred to Other Agency
Concerned Party: Anonymous Concern Info: rec'd via complaint form on 1/15 - sent to DNR on 1/20 - cp states: Rotten egg smell entering the town from Hwy 47 [sic] Conclusions: Upon receiving the concern, I contacted the City of Bonne Terre and spoke with Shawn Kay, City Administrator. I informed him of the concern we received and let him know the approximate area. He stated he had been in that area earlier that day but had not noted any odors. He then stated he would travel out there again and let me know if any notable odors were observed. No response was received.								
65074	01/12/2026	01/12/2026	Heartland Application	Other	Sikeston /Scott	SERO	LR	Site Visit
Concerned Party: Bethany Concern Info: rec'd via EPA Region 7 - cp states: My children attend Scott County Central Elementary location din Scott County, MO. A neighboring land owner and operator of Heartland Application constantly disposes industrial/animal waste on his property. The smell is so terrible and strong that kids are not able to go outside. The smell also comes inside the building within the ventilation and makes staff, students and visitors uncomfortable in the school. The landowner has been contacted by the school and claims that he is in the right to dispose of/spray the waste on his property in approval of the Department of Natural Resources; however he has been overheard bragging about falsifying soil samples to make his property seem cleaner. I am worried about eh children's long term health effects of prolonged exposure and breathing in the waste products from animals being sprayed/disposed of in the air and would appreciate if the situation was further investigated to ensure it doesn't pose a risk to our community and children. Thank you for your time and consideration. [sic] Conclusions: On January 7th, 2026, Olivia Reynolds, Environmental Specialist, Water Protection Program; Bailey Gargac, Environmental Specialist, Air Pollution Control Program; and I visited the site to observe the land application and conduct an odor monitoring investigation. During the odor monitoring investigation, we stopped at various locations surrounding the property. At locations 1-3, we were able to detect an odor but did not deem it necessary to use the Nasal Ranger, as the odor was not strong. At location #4, we utilized the Nasal Ranger but were unable to detect an odor at a 2:1 ratio. No odor violations were noted at the time of the investigation. Please refer to CON-1122 for Odor Monitoring Report. See CON-1122 for Odor Monitoring Worksheet and map. On January 30, 2026, Hayden Cassinger and Olivia Reynolds called the concerned party. The concerned party did not answer, so a voicemail was left, letting them know the concern had been investigated and encouraged them to call back if they had any questions. As of February 3, 2026, the concerned party has not called back.

65075	01/09/2026	01/09/2026	Heartland Application	Other	Sikeston /Scott	SERO	LR	Site Visit
Concerned Party: Anonymous Concern Info: Received by EPA 20260107. Received by Department 20260109. CP States: A local business applies industrial waste to their property that is adjacent to the school and the smell is terrible. The kids are not able to go outside some days. The smell has gotten into the school building and makes staff, students and visitors not want to come to school. The owner was overheard stating that he had falsified records of soil sampling to make it appear that his property was cleaner. I would appreciate if this situation was checked out to make sure we are not sending our children into a dangerous environment. Thank you. [sic] Conclusions: See CON-1122 for Odor Monitoring Worksheet and Map: On January 7th, 2026, Olivia Reynolds, Environmental Specialist, Water Protection Program; Bailey Gargac, Environmental Specialist, Air Pollution Control Program; and I visited the site to observe the land application and conduct an odor monitoring investigation. During the odor monitoring investigation, we stopped at various locations surrounding the property. At locations 1-3, we were able to detect an odor but did not deem it necessary to use the Nasal Ranger, as the odor was not strong. At location #4, we utilized the Nasal Ranger but were unable to detect an odor at a 2:1 ratio. No odor violations were noted at the time of the investigation.								
65077	01/07/2026	01/07/2026	Jeff Limbaugh	Odor Land Application	Morley /Scott	SERO	LR	
Concerned Party: Anonymous Concern Info: Received by email. CP States: Terrible odor from land application of biosolids. Jeff Limbaugh is the permit holder. Don't believe his injection is working well or he is top dressing without tillage. [sic] Conclusions: On January 7th, 2026, Olivia Reynolds, Environmental Specialist, Water Protection Program; Bailey Gargac, Environmental Specialist, Air Pollution Control Program; and I visited the site to observe the land application and conduct an odor monitoring investigation. During the odor monitoring investigation, we stopped at various locations surrounding the property. At locations 1-3, we were able to detect an odor but did not deem it necessary to use the Nasal Ranger, as the odor was not strong. At location #4, we utilized the Nasal Ranger but were unable to detect an odor at a 2:1 ratio. No odor violations were noted at the time of the investigation.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65103	02/06/2026	02/10/2026	Capital Sand Proppants, LLC	Industrial Stormwater	Jackson /Cape Girardeau	SERO	CB	Phone Conversation
Concerned Party: Anonymous Concern Info: rec'd via email - cp states: I'm one of the countless residences within a mile of the sand plant. Our entire house (a new build with a basement) shakes every day from the blasts from the plant. And the plant often operates well into the night, creating a horrible whine you can hear across the countryside, not to mention the light pollution. Every day on my commute, vehicles are stuck behind the trucks transporting the mined sand to I-55, which drive 30 mph below the speed limit on our country roads, creating deep rivets into the roadways and backing up traffic. Additionally, there is no known air quality monitoring anywhere in Cape Girardeau County. I'm very concerned about the air quality, as well as water pollution in the nearby rivers and creeks. I've researched extensively and found no recent investigations (other than an employee's wrongful death suit from OSHA). [sic] Conclusions: On February 10, 2026, I conducted a site visit to the Capital Sands facility located in Millersville, and I observed Outfall 011 from County Road 347. At the time of the site visit, Outfall 011 was discharging. It was noted that the effluent discharging from Outfall 011 was slightly turbid. Following the site visit, I contacted the site manager of Capital Sands-Millersville, Brandon Baker (573-576-1405). Brandon and I discussed components of the concern, and it was discussed that the facility had been having trouble with a disgruntled neighbor for several months. I informed Brandon that I had conducted a site visit, and that effluent observed coming from Outfall 011 appeared to be slightly turbid. Brandon stated that the facility dredges all of its settling basins on a quarterly basis, and that he was not aware of any current issues with the facility's BMPs. A two-year record review of MSOP MOG491269 was conducted, and no effluent violations were noted at the time of the review. Brandon stated that he would check the basin and other BMPs to ensure they were functioning as intended. Brandon also stated that the facility would begin dredging the basins, and rock check areas, prior to the facility's outfall to be on the safe side. On February 17, 2026, Brandon Baker provided photographs of the facility's settling basin and rock check areas prior to Outfall 011. The photographs included conditions of the BMPs before and after dredging had occurred. These photographs have been saved to the Cape Girardeau County concern folder within the department's EFC. Brandon stated that the facility will continue to monitor all BMPs to ensure the facility is meeting limits. The department does not regulate personal property damage, operating hours, noise, light pollution, or road and traffic conditions. A site visit to the Capital Sands- Millersville was conducted on February 10, 2026. After viewing a major outfall for the facility, contact was made with the site manager of the facility, Brandon Baker. The concern was discussed, and the facility has conducted maintenance to BMPs prior to the facility's outfall. Photographs of the maintenance have been provided to the department, and the photographs have been saved to the Cape Girardeau County concern folder within the department's EFC. The department will continue to monitor.								
65121	02/03/2026		Dean & Opal Swedeen	Open Burning	St. Clair /Franklin	SLRO	GH	
Concerned Party: Anonymous Concern Info: I received a call from an anonymous caller who that an individual at 3351 Schuchart Park Road in St. Clair that burning is continuing on site mostly overnight. Noticed them burning over the weekend. Flea market material added in spring/ summer mostly. Stated that a neighbor smelt stuff burning at several points. [sic] Conclusions: I was unable to contact the property owners to get on property, a letter will be sent to the property owners to address the solid waste on site. Since I was unable to get on site I was only able to confirm the solid waste on site and unable to determine if a burn occurred. The property owners are receiving a Solid Waste Management Law violation on "dumping or depositing or permitting the dumping or depositing of solid wastes onto the surface of the ground in an area not permitted by the department, in violation of Section 260.210.1(1) RSMO." For additional information please see the Unsatisfactory findings for the site.

65140	02/25/2026	02/05/2026	Unknown	Hazardous Air Pollutant Release	Cape Girardeau /Cape Girardeau	SERO	OR	Communication In Person
Concerned Party: Anonymous Concern Info: Received via email CP states: Someone has been dumping a bright orange chemical powder next to Tower East of SEMO Campus. It reeks of ammonia, and is just sitting on the ground. [sic] Conclusions: Hannah Goetz and I investigated the concern on February 25, 2026, when we were on campus for the MS4 Audit. We were accompanied by Autumn Gentry and Sylvia Forester of the SEMO MS4 Program. It appeared that the “bright orange chemical powder” referenced in the concern was pet bedding shavings. It did have a slight ammonia smell - similar to animal urine. It was also noted that there were shavings in the adjacent trashcan. Autumn stated she would submit a work order and have it cleaned up the next day. When Hannah returned on February 26, 2026, to complete the MS4 Audit, it was discussed at that time that they investigated the concern further and confirmed that it was actually a combination of used cooking oil and vomit absorbent powder. The powder and oil have been cleaned up. The concern was referred to the SEMO MS4 Coordinator, Autumn Gentry, and appropriately cleaned up. No further action necessary at this time.								
65142	02/03/2026		Royal Oak	Hazardous Air Pollutant Release	Salem /Dent	SERO	OR	Email
Concerned Party: Afred Melton Concern Info: rec'd via email incident tracking - cp states: dumping lighter fluid on the ground in large quantities. Guessing up to 50 gallon a day when running easy light charcoal. Has been common practice to do so for years. has been brought to plant manager attention several times and no change being made [sic] Conclusions: I arrived on site accompanied by Hayden Cassinger who is with the Air Pollution and Hazardous Waste Program within the department's Southeast Regional Office. We spoke with office personnel who spoke with Brian Matt via telephone. Brian stated he would be enroute to the Salem office as soon as possible. Once Brian arrived we were accompanied by Plant Manager Lee Mays in person and Kevin Crain who is the VP of EHS within Royal Oak Enterprises via Teams Meeting. We explained the meaning of the visit and the nature of the concern received by the department. Throughout our conversations Royal Oak personnel maintained the position that this practice would be financially wasteful and would not be promoted as a standard practice. Brian and Lee then escorted us around the facility. We focused our investigation around char shed #2 and the lighter fluid drench system. We observed the entirety of char shed #2 and parts of char shed #1. At the time of the investigation there was no evidence of lighter fluid miss handling at the char sheds. After the char sheds we looked at the lighter fluid drench system and Brian explained the drench process and how lighter fluid and excess lighter fluid is handled. While on site, we viewed both stormwater outfalls. Neither outfall was discharging and the stormwater basins were free of any sheens. No visible concerns were noted. Brian explained that the facility would update the site's Standard Operating Procedures (SOP) to better explain the lighter fluid aspects of the facility. Training on lighter fluid and fines would be implemented to ensure any confusion by personnel would be cleared up. An updated copy of the lighter fluid and fines SOP was provided via email on February 17, 2026. Conclusions No visible water quality concerns at the time of the site visit conducted on February 11, 2026.								

Concern No.	Received Date	Investigation Date	Suspected Source Owner/Operator	Concern Type(s)	City/County	Region	Inspector Initials	Final Action
65143	01/23/2026		Andy Ward	Open Dumps Open Burning	Reeds /	SWRO	GE	
Concerned Party: Anonymous Concern Info: From Web: On January 16, 2026, the above noted report was made to your department regarding an incident on January 12, 2026 at the address noted above. My property is adjacent directly north to this residence. In October, 2025, I had noticed burning there that created huge black clouds of smoke. On November 20, 2025, I witnessed a large dump truck from S&E Dumpster and Hauling Solutions dumping a large load of black material at this residence. I had a friend drive me past while I filmed the load of material and the truck sitting in the drive. Burning immediately started with thick black smoke and a very toxic smell. On November 22, 2026 I did reach out to the fire department, but to my knowledge they never came out. I called because the smoke was so thick on Highway 37 that it was barely passable and cars were braking as they drove past. I also have this filmed. This burning has continued since then. One load of material that was approximately 30 feet long, 20 feet wide and 15 feet high disappeared after a night when you could hear a tractor running all through the night. The area where it had been was covered over with dirt. There is activity there most night. Two of my neighbors think that it is a meth cooking operation based on the people who are frequenting at night. I made the call on January 12, 2026. On January 16, 2026 I again filmed burning with large black clouds and toxic smell. My neighbor said that we should call the Carthage Fire Chief. He responded quickly noting that it was not in the Carthage district. On January 20, 2026 there was burning all night and lots of cars in and out. On January 21, 2026 the burning started at dusk and was still burning when I went to bed at 10:00. I again filmed the massive clouds very apparent in the night sky. Today I called the Sheriff. Chief Deputy Derek Wood took my call and responded back quickly. He researched and reported to me the outcome of the January 12, 2026. This was helpful since I had not been informed of the details. Additionally, I would like to note that there are piles of trash and debris everywhere on this property. Particularly of note is an old trailer, perhaps 40+ years old, that one side is ripped off of and debris blows out of it on windy days. We question if it is asbestos or some other toxic substance .Please let me know if you would like to see my pictures and videos. I would also like to know the action that will be taken [sic] Conclusions: CON-1289								
65204	02/04/2026		City of Clarksburg	Bypass or Sewer Overflow Odor	/Moniteau	CFO	KF	
Concerned Party: Michael Romano Concern Info: Inoperative sewage dump station - it was dug up and not repaired. Leaving an open system with raw sewage running through my yard. Awful smell [sic] Conclusions:								
65243	02/02/2026	02/03/2026	YES Byrnes Mill, LLC Wastewater Treatment Facility	Minor Wastewater Facility	/Jefferson	SLRO	CM	
Concerned Party: Don Brandt Concern Info: Online concern form received: "Byrnes Mill Farms mobile home park has a sewage treatment pond. I don't think there are any aerator running. I don't live in the park, but I drive by every day to work. The smell of raw sewage is very disgusting and nauseating. It makes you sick just driving by. I can't imagine actually living near there." Driving Directions From Upper Byrnes Mill Road, turn right onto Byrnes Mill Rd. Pass Silverstone Trails Dr and the city park, go around the sharp rt hand curve and it is along Byrnes Mill Road on your right. It runs parallel and Southeast to River Creek Ct. [sic] Conclusions: NOV has been issued to the facility. Waiting on final facility response.								
65249	02/11/2026	02/27/2026	Jason Schlotter	Open Dumps	Holts Summit /Callaway	NERO	NG	
Concerned Party: Anonymous Concern Info: I was stopped by an individual while conducting another investigation. The individual stated that they wanted to remain anonymous but would like to file an environmental concern on the property to the west of 3549 County Road 4006, Holts Summit, Missouri 65043. This individual stated that the property had various waste and debris piled on it. [sic] Conclusions:
